Toyota GR Cup North America

2026 SPORTING REGULATIONS

DRAFT

January 23, 2026

DRAFT

The 2026 Toyota GR Cup Sporting Regulations have been re-ordered to better follow the chronological flow of an Event Weekend. A cross-reference table is located after the Appendices.

2026 SPORTING REGULATIONS
DRAFT
January 23, 2026

FOREWORD

SRO Motorsports Group (hereafter "the Organizer"), will organise the Toyota GR Cup (hereafter "the Series") reserved for Toyota GR Cup Cars , which is the property of Toyota.

The Series is governed by the FIA International Sporting Code and its appendices (hereinafter "the Code"), the general prescriptions applicable to International Series, the 2026 Technical Regulations for Toyota GR86 Cup Cars, and the present Sporting Regulations specific to the Series, as well as clarifications and bulletins issued by the SRO Sporting Board during the season in accordance with Article 2.1. All the participating parties (Organizer, SRO, ASN's, Organizers, Competitors, and Circuits) commit to apply as well as observe the rules governing the Series.

The Series comprises of 1 (one) Championship for Toyota GR Cup Drivers and 1 (one) Championship for Toyota GR Cup Teams.

Certain aspects relating to the application of the Series regulations have been entrusted to the SRO Sporting Board and SRO Technical Board, as defined in Appendix 5.

For the purposes of these Sporting Regulations, the term 'Event' is defined as follows:

An Event consists of the following: All administrative checks, technical scrutineering, test sessions, practice sessions, qualifying sessions, and all races for a specific class, series, or category held at a specific site on specific dates.

Within these Sporting Regulations, terms referring to natural persons are applicable to both genders.

1. REGULATIONS

1.1 The final text of these Sporting Regulations shall be the English version, which will be used should any dispute arise as to their interpretation. Headings in this document are for ease of reference only and do not form part of these Sporting Regulations.

1.2 These Sporting Regulations are effective January 1, 2026 and supersede all previous Sporting Regulations regarding this Series.

1.3 Not Applicable

1.4 Any breach of the regulations listed in these Sporting Regulations is subject to penalty.

1.5 Any revisions to the Sporting Regulations communicated via an Official Sporting Note, Technical Bulletin, Balance of Performance, or given for a specific Event in the Appendix 1 Supplemental Regulations for an Event, will take precedence over the original regulation(s). The Team Packet, the Drivers' Briefing Notes, the Logistics Briefing Notes, and any other Briefing Notes issued are formal documents which must be complied with.

1.6 These regulations are subject to changes and additional safety measures in accordance with the COVID-19 Safety Protocol issued by SRO and supplemented by regulations set by the various Governments and National Sporting Authorities (ASNs). Any such changes or measures will be communicated to the Teams through the Appendix 1 documents for the Event and/or Sporting Notes.

1.7 These regulations will be used for all TGRNA GR Cup Events.

2. COMMITMENT

2.1 All Manufacturers, Drivers, Competitors, Officials and anyone participating in the Series commit, on behalf of themselves, their employees, and their agents, to observe all the provisions of the Code (as supplemented or amended), the FIA Technical Regulations (Article 257A of Appendix J) of the Code, Bulletins and Clarifications issued by the SRO Sporting Board during the season and the current Sporting Regulations and its appendices. Bulletins will be approved by the United States Auto Club (USAC).

2.2 All Manufactures, Drivers, Competitors, Officials and anyone participating in the Series agree that they:

a) Have read and understand the Regulations
b) Agree without reservation to abide by these Regulations
c) Renounce the right to have legal recourse, except with the written consent of the Organizer, to any arbitrator or tribunal not provided in these Regulations

2.3 Determinations by Organizer officials are non-litigable; Drivers and Competitors will not initiate or maintain litigation of any kind against the Organizer, or anyone acting on behalf of the Organizer, to reverse or modify, such determinations, or to seek to recover damages, or other relief allegedly incurred, or required, as a result of such determination. If a participant, entrant, Competitor, or official initiates or maintains litigation in violation of this provision, that individual or entity agrees to reimburse the Organizer for all costs of such litigation, including travel expenses, and attorneys' fees. Competitors and/or officials involved in such litigation as plaintiffs will have all SRO Motorsports America privileges suspended until litigation is complete.

DRAFT

3. SERIES EVENTS

3.1 Each Event will have the status of a restricted National Event.

3.2 The Series is made up of seven Events consisting of two races with a maximum duration of 45 minutes each.

3.3 The maximum number of Series Events is seven.

3.4 The definitive list of Events will be published by the Organizer before January 1st, 2026. However, in case of force majeure, the Organizer reserves the right to modify this date as well as the format of any Event.

3.5 An Event may be cancelled or postponed in case of force majeure, or with the agreement of USAC and the Organizer. In case of force majeure, the two races of one Event may be postponed, divided between 2 (two) Events, or integrated into another race or Event.

3.6 Competitors are responsible for ensuring there are no restrictions or schedule conflicts which would affect their participation in any Event they enter.

4. GENERAL CONDITIONS

4.1 It is the Competitor's obligation to ensure that all persons concerned by his entry observe all the requirements of the Code, the applicable Technical Regulations, the current Sporting Regulations, the Appendix 1 to each Event as well as Bulletins and Clarifications from the SRO Sporting Board issued during the season. The term "Competitor" includes team owners, team principals and team managers.

4.2 Each Competitor must nominate a representative(s) and an alternate team representative on the Briefing and Entry List Acknowledgement form. Either the team representative or the alternate team representative must be available for the duration of the Event. These 2 (two) people must be designated during Administrative Checks. SRO Team Relations must be notified of any changes or additions to the representative(s) made after Administrative Checks have closed.

4.3 A person having charge of an entered car during any part of an Event is responsible jointly and severally with the Competitor for ensuring that the requirements are observed.

4.4 Competitors must ensure that their cars comply with the conditions of eligibility, safety, the Balance of Performance and with the applicable Technical Regulations throughout the Event. Failure to comply will be considered a sporting infringement and penalties may be imposed by the Stewards.

4.5 The presentation of a car for Scrutineering at any time during the Event will be deemed an implicit (legal) statement of the conformity of the car to the homologation, the Balance of Performance, and all articles of these Regulations.

4.6 All Session results, including Races, remain provisional until all sporting matters and technical scrutineering are completed, including the review of any video footage when applicable, and all Protests and Appeals, and Rights of Review have been adjudicated.

4.7 A Representative from each Team (Article 3.2) must be available to the Stewards until the final classification is published. The Fanatec GT World Challenge America App (hereinafter referred to as

DRAFT

"the Series App" – Article 14.1) is an Official form of communication and must be monitored until the final official results are issued.

4.8 Competitors, Drivers, and all persons associated with an entered car, are responsible for all costs related to the repair of the facility property caused by the actions of the Competitor and / or associated person(s). Failure on the part of the competitor and / or associated person(s) to make restitution to the billing party may result in the offending Party being prohibited from competing in future Events until such payment(s) is made.

4.9 Series Drivers, Competitors and Officials participating in the Series must hold a current and valid license from SRO / USAC.

4.10 Not applicable

5. EVENT APPLICATION AND INSURANCE

5.1. An application to organize a Series Event must be made to USAC, which will apply to the parent ASN (ACCUS) together with the Organizer. Each organizer via its ASN or representative shall also supply the information set out in Appendix 1 to the present regulations to the Organizer at least 30 days before the Event.

For each of the Series Events, a letter of invitation or Visa is issued by the hosting ASN of the country in which the Event is organized, provided that all documents required by the present regulations have been duly sent to the ASN and are in conformity with the regulations applicable to the Series.

5.2 The Organizer of an Event must ensure that all Competitors, their personnel, and their Drivers are covered by third party insurance.

5.3 Third party insurance arranged by the Organizer of a Series Event shall be in addition and without prejudice to any personal insurance policy held by a Competitor or by any other natural person or legal entity taking part in the Event.

5.4 Drivers taking part in the Event are not third parties with respect to one another

6. OFFICIALS

6.1 The following Officials will be appointed for the Series listed under Article 5. The description of their main duties can be found under Article 11 in the ISC (International Sporting Code) Some roles may be combined.

a) A Race Director
b) A Deputy Race Director
c) A Technical Manager
d) A Series Scrutineer
e) A Chairman of the Stewards
f) A Technical Director for the Series
g) A Sporting Director for the Series
h) A Pit Lane Official

DRAFT

i) A Chief Timekeeper
j) A Press Manager
k) A Safety Car Driver
l) A Driver Advisor (if applicable)
m) A Sporting Board for each Event

7. CHAMPIONSHIP CLASSES

7.1 Series Drivers do not require FIA licenses or categorizations.

7.2 Not applicable.

7.3 Not Applicable

7.4 Not Applicable

7.5 Not Applicable

7.6 Not applicable.

7.7 Not applicable.

7.8 Not applicable.

7.9 Not applicable.

7.10 Not applicable.

7.11 The Series reserves the right to adjust the required ballast of an individual Driver if:

a) The Series management agrees that he is overqualified for the class by experience.
b) The Driver's performance is impacting the Series to the detriment of other drivers in the same make and model.

The ballast adjustment will be an increase of 1.5% of the base homologation weight of the car added to the minimum weight of the car.

The Team Representative for the Driver in question will be informed with enough time to effect the change, a minimum of 60 minutes before the next official session. The adjustment may be verified at Scrutineering at any time during an Event. The Driver will be subject to the adjusted ballast level until otherwise advised by the Series.

7.12 Not applicable.

7.13 Not applicable.

7.14 Not applicable.

7.15 Not applicable.

DRAFT

7.16 The Organizer reserves the right to review the eligibility of an individual Driver if:

a) The Series management agrees that he is overqualified for the class by experience.
b) The Driver's performance is impacting the Series to the detriment of other drivers in the same make and model.

7.17 Past champions will be eligible to participate in the season(s) following their championship for a maximum of six races. The driver will not be eligible for prize money or points.

8. DRIVER DESIGNATIONS

8.1 Not Applicable

8.2 Driver Changes

a) During the Event, a Driver may not change from one car to another car in the same series.
b) Each Driver may only be nominated to drive 1 (one) car.
c) A change of Driver may only take place with written consent of the Stewards.
d) Not applicable.

9. EVENT ENTRY: APPLICATIONS, CONDITIONS

9.1 The series may limit the maximum number of full-season entries that will be accepted.

9.2 Full-season and Single Event Competitors are accepted.

9.3 Not applicable

9.4 Entries are not transferable and entry fees are not refundable.

9.5 All amounts are excluding any applicable taxes which may be added according to applicable rules depending on the Competitor's tax status.

9.6 The Organizer reserves the right to refuse any application.

9.7 The Application form must include the following:

a) Confirmation that the applicant has read and understands the Code, the Technical Regulations and the Sporting Regulations and agrees, on its own behalf and on behalf of everyone associated with its participation in the Series, to observe them.
b) The name of the Competitor (as it appears on the Competitor license).
c) The name of the official Team Representative who is authorized to sign on behalf of the Team.
d) Not applicable
e) The make, model, and model year of the competing car(s).
f) Not applicable
g) The name of the Driver.
h) The commercial name the Team wishes to use (this does not have to be the Competitor license name).
i) A commitment by the applicant to participate in every Event with the number of cars entered (full season entrants only).

DRAFT

j) The full payment of the entry fees.
k) Transponder Number.

9.8 All Competitors must abide by the Toyota Racing Style Guide with regards to pit signage, car livery, hauler branding, crew apparel, and Team and Driver suits. The Organizer reserves space on the cars and uniforms of all Competitors. No sponsorship from companies associated with the manufacture, re-treading, sale or distribution of tires is authorized.

9.9 Each Team must sign the Team Commercial Agreement and return it to the Organizer no later than the start of the first Event entered. Failure to sign the Agreement may be reported to the Stewards and the Team in question may be refused permission to participate in the Event.

9.10 Cars entered under different licenses may not have similar liveries. Any Teams have liveries that cannot be easily distinguished by Marshals and/or Officials will be requested to make sufficient alterations before any Event in which they participate. Within any Team, cars must have easily distinguishable features. Any logo that could be confused with a car's racing number is prohibited.

9.11 Each Entrant may enter a maximum of seven cars.

10. ELIGIBLE CARS

10.1 Events are first and foremost reserved for the following categories of cars:

10.1.1 Toyota GR86 Cup cars homologated by SRO Motorsports as defined by the applicable Homologation and Technical Regulations. Only cars built and sold by TRD for the purposes of GR Cup are permitted. Any permitted car must adhere to the corresponding Technical Regulations, Manufacturer Bulletins and Series Technical Bulletins

10.1.2 Not applicable

10.1.3 Cars fitted with adaptations solely for the purpose of allowing their use by Drivers with disabilities will be authorized. These adaptations must be registered and approved by the SRO Technical Board. Any such cars must carry the universal logo approved by the FIA Disability and Accessibility Commission distinguishing them as a disabled Driver (Appendix L, Article 11.2 of the Code).

10.2 All cars must be in conformity with the list of safety features according to their respective Technical Regulations and homologation documents.

10.3 Not applicable

10.4 Not applicable

11. NUMBER OF CARS ALLOWED TO PARTICIPATE

11.1 The maximum number of cars allowed to participate in practice and to start any race is calculated according to Supplement Number 2 of Appendix O to the Code.

DRAFT

11.2 If the number of applications to enter a Race exceeds the maximum number as calculated above or a lower number given in the Appendix 1 document for the event, the Competitors will be selected according to the following criteria:

a) Full season Competitors.
b) Additional entries from full-season Competitors.
c) Single Event Competitors who have already participated in a previous Race of the Series.
d) Any other criteria as decided by the SRO Sporting Board.

12. LIVERIES, NUMBERS, GRAPHICAL CHARTER

12.1 Each car must display the race number allocated by the Organizer. Eligible numbers are 002-009, 02-09, and 2-999.

Priority for assigning numbers is as follows:

a) Not applicable
b) Second priority goes to Teams re-registering their 2025 Vehicle Number and prepay for a full season by December 1, 2025.
c) Third priority goes to Teams that prepay for a full season by December 1, 2025.
d) Fourth priority is assigned on a time-stamp basis from the date entries are received and paid.

12.2 Race numbers and advertising on the cars must be in conformity with the Toyota Racing Style Guide for the Event and must be clearly visible from the front and from each side of the car. Any logo which could be confused with a car's racing number is prohibited.

12.3 Every car must carry its race number on the rear of the car. The numbers will be provided by the Organizer.

12.4 For Events with night running, race numbers on the doors must be backlit. Teams will be advised of any night races in advance.

12.5 If it is impossible to identify a car from its race number, it may be stopped by the Race Director.

12.6 Each car and Driver must adhere to the Toyota Racing Style Guide (Appendix 3) for each Event in terms of the livery of the car, Driver suits, pit garage, and Team clothing, as well as the restrictions noted in Article 11.10.

13. CHAMPIONSHIP POINTS ELIGIBILITY

13.1 At the discretion of the Organizer, in any category, a title or trophy may be awarded if at least two cars are entered in the Event.

13.2 Teams and Drivers entered in an Event of the Series will score points towards the Teams and Drivers titles with the exception of Single Event entry Competitors in the final 2 (two) Events of the season. Single Event entry Competitors will only score points towards the Teams classifications in the final 2 (two) Events if they have participated in a previous Series Event during the season.

DRAFT

13.3 Any cars which are eligible for Championship points shall be scored in a position higher than that of cars which are not eligible for Championship points according to Article 6.3.2

13.4 For any Team title, the name on the the Competitor's license will be used to determine points for the overall title, independently of the commercial Team name used in individual events. Competitors may use different commercial Team names in different events. Teams may specify a Team commercial nationality to be used on the podium, TV Graphics, and car flags provided this can be justified in terms of the nationality of the commercial sponsor, the nationality of the majority of the Drivers, or the home base of the Team. This commercial nationality is independent of the nationality of the license under which the Competitor is entered.

13.5 In any category, competitors who have crossed the control line after the completion of the scheduled number of formation lap(s) are eligible for championship points.

13.6 A Team is defined as the cars entered under a specific Competitor's license. A Team may use a Commercial Team name which is different from the Competitor name. No 2 (two) Teams may use the same Commercial Team name.

14. MANDATORY EQUIPMENT

14.1 Data Acquisition System

All Competitors must use the homologated data acquisition system as defined by the SRO homologation. This system must be used throughout each Event and must work correctly at all times during each Event. It serves exclusively to store the data acquired, which may be checked at any point during any Event. The weight of the system is included in the minimum weight of the car.

All costs connected with the checking, servicing, and updating of the system are borne entirely by the Competitor. Reference the homologation for all information concerning the Data Acquisition System.

The Organizer reserves the right to distribute vehicle data following practice, qualifying, and/or races to all other competitors. The SRO Technical Department will provide access to the data via a share link and will notify teams when the data becomes available.

No other data systems are permitted in any form.

14.2 Incident (In-Car) Camera

The homologated onboard Incident Camera must be installed in the car. This system must be used throughout each Event and must function correctly at all times during each Event. The weight of the Incident Camera system is included in the minimum weight of the car.

The Incident Camera must be powered on and recording as the car leaves its garage / paddock area. Series Officials may recover the footage after all practice sessions, qualifying and races. The footage can be used only by Series Officials and may not be posted on any social media platform. Violators will be reported to the Stewards. The date and time on the camera must be set properly. All cards must be clearly marked with the competitor's class, car number, and session (P1, P2, Qual 1, Qual 2 Race 1, Race 2). Cards must be large enough to capture the entire session on 1 card. Cards must be properly formatted and cleaned of past video materials. Penalties may be applied for cards that are not submitted when requested and/or for cards lacking video data from the assigned session.

The Technical Manager is entitled to require modifications to both the camera's position and/or the angle of view. The Competitors shall bear the related cost. No parts or equipment obstructing the

DRAFT

camera's view shall be installed between the camera and steering wheel and the camera and windscreen.

A plaque on the dashboard bearing the Series logo, car number and Driver's last name is required and must be clearly visible in the on-board video.

14.3 **Transponder**

Each Driver must use the Driver timing transponder specified by the homologation throughout the Event. It is the responsibility of each Competitor to obtain this transponder at their own expense, to install it in strict compliance with the homologation, ensure it functions correctly, and to ensure it is showing the correct information at all times. Any problems with the transponder must be reported to the Chief Timekeeper immediately.

If it is determined that the Timing Transponder is not functioning correctly, the Race Director is authorized to stop the car in its pit box until the situation is resolved. SRO / USAC Timing will assist the Team with troubleshooting the problem provided the Team is using a MyLaps TR2 transponder. No troubleshooting assistance will be provided if the Team is using any other transponder configuration.

14.4 Teams are responsible for making sure the correct Driver is shown on the USAC timekeeping system. If an incorrect Driver ID is recorded at pit entry or pit exit, the Race Director is authorized to stop the car in its pit box until the situation is resolved.

14.5 **Lumirank Panel**

Each competitor must use a Lumirank Light Panel supplied by the Organizer throughout the event. Manuals detailing equipment information and wiring diagrams for the Lumirank Panel are located on the Teams website under Technical > Data Logger / Lumirank / RaceLink / Transponder / Driver ID > Lumirank / Racelink. It is the responsibility of each competitor to:

a) Obtain the Lumirank Light Panel from SRO.
b) Install it in strict compliance with the instructions.
c) Confirm it functions correctly.
d) Confirm it is always displaying the correct information.
e) The LR V32SEG is the only Light Panel Permitted for use in TGRCNA.

If it is determined that the Lumirank Panel is not functioning correctly, the Race Director is authorized to stop the car in its pit box until the situation is resolved.

DRAFT

14.6 **GPS Telemetry (MyLaps RaceLink)**

Each competitor must use a MyLaps RaceLink data unit supplied by the Organizer throughout the event. Manuals detailing equipment information and wiring diagrams for the MyLaps RaceLink are located on the Teams website under Technical > Data Logger / Lumirank / RaceLink / Transponder / Driver ID > Lumirank / Racelink. It is the responsibility of each competitor to:

a) Obtain the MyLaps RaceLink from SRO.
b) Install it in strict compliance with the instructions.
c) Confirm it functions correctly.
d) Confirm it is always displaying the correct information.

If it is determined that the MyLaps RaceLink unit is not functioning correctly, the Race Director is authorized to stop the car in its pit box until the situation is resolved.

The MyLaps Racelink unit may not be transferred to a different chassis without express authorization from the Organizer. Any transfer of the MyLaps Racelink unit from one chassis to another without authorization from the Organizer may be reported to the Stewards.

Data may be used by Officials to assist with any investigations or decisions.

14.7 Teams are required to return the GPS timing module and the Lumirank equipment to the Chief Timekeeper for inspection and evaluation upon request from the SRO Technical Department.

14.8 Not Applicable

14.9 Not Applicable

14.10 **In-car Marshalling System**

Each competitor must use a Driver Information Display (DID) supplied by the Organizer throughout the event. Manuals detailing equipment information and wiring diagrams for the MyLaps RaceLink Pro are located on the Teams website under Technical > Data Logger / Lumirank / RaceLink / Transponder / Driver ID > Lumirank / Racelink. It is the responsibility of each competitor to:

a) Obtain the DID from SRO.
b) Install it in strict compliance with the instructions.
c) Confirm it functions correctly.
d) Confirm it is always displaying the correct information.

The SAS DID V20 is the only data unit permitted for use in Toyota GR Cup.

The driver is obligated to adhere to the flagging messages displayed on the DID system. If it is determined that the Driver Information Display is not functioning correctly, the Race Director is authorized to stop the car in its pit box until the situation is resolved.

14.11 Failure to return any equipment rented from the Series or to provide shipping confirmation, including tracking information, within 14 days of the Competitor's last Event entered will result in the full replacement value of the equipment being charged to the Team. Once invoiced, no refunds will be issued.

14.12 **Accident Data Recorders**

Not Applicable in 2026

DRAFT

14.13 **Lifting Bars**
Not applicable in 2026

14.14 Cars must meet the minimum illumination as listed below or may be stopped for repairs:

a) 1 headlight
b) 1 taillight
c) 1 brake light.
d) The illumination of a single number panel (if required for the event).
e) A rain light

14.15 Should the Race Director determine that a failure of any of the above is not a safety issue, the Team will be informed and may be required to make the repair at the next scheduled pit stop.

14.16 The car's headlights, taillights and rear rain light(s) must be illuminated when instructed by the Race Control. Instructions may be issued by Race Control to indicate when lights can be switched off.

14.17 Not applicable

14.18 Not applicable

14.19 Not applicable

15. TIRES

15.1 Only tires from Continental, as supplied, may be used during the Event. Tires must be ordered and paid for by the deadlines set by Continental.

Only 1 (one) type (specification and dimensions) of dry-weather tire and 1 (one) type of wet-weather tire will be registered per car unless otherwise approved. The list of the approved tire specifications will be published a minimum of 2 (two) weeks prior to the first Event in the Series.

15.2 All tires must comply with the specifications determined by Articles 29.7 and 29.8. Any chemical and/or mechanical treatment of the tires is prohibited. The original tire tread and profile may not be modified or cut. Modification to marking, reference, information written on the tire or any traceability means is forbidden. This includes, but is not limited to, the barcode, manufacturer serial number, type of tire, dimensions, and any other relevant items.

15.3 Teams must adhere to the limits detailed in the technical directives issued by Continental and received from the Organizer before the first Official Event, as well as to any other Technical Bulletins received during the season.

15.4 Teams and Drivers are required to sign the acknowledgement of risks form issued by Continental prior to their first on-track session of the season. Should a Driver change Teams, a new form must be completed and signed. Upon entering the Series, Teams are required to sign and return the 'Supply Agreement with Teams' issued by Continental.

15.5 A new tire is one that has not been previously registered and/or allocated to a car. A set of tires must comprise of 2 (two) front tires and 2 (two) rear tires.

DRAFT

15.6 A used tire is one that has been registered for a previous Event with the same car number. For single Event Entrants, this is any previous Event in which the car was entered. Used tires must be presented to Continental for checking and re-registration following the process defined by the Organizer and Continental. Continental maintains a list of the tires which have been recorded during the season. Used tires must be taken to Continental for re-registration before any new tires are fitted.

15.7 A tire with no tread pattern on any part of the tire surface is a dry weather tire.

15.8 A tire which is grooved more than 30% symmetrically around the tire centerline and designed for use on a wet track is a wet weather tire. Only wet weather tires supplied by Continental may be used.

15.9 The tire manufacturer must provide the Organizer with a 1:1 scale legality drawing of the profile they wish to use. This profile must be registered with the Organizer and will be the only one authorized throughout the season.

15.10 Control of tires

a) The control of the tires will be carried out according to a process defined by the Organizer.
b) The outer sidewall of all tires which are to be used at an Event must be marked with a unique identification.
c) Other than in cases of force majeure (accepted as such by the Stewards), the barcode list of all dry-weather tires intended for use at an Event must be presented to the Technical Manager prior to the end of initial scrutineering.

15.11 The use of any artificial means for the purpose of pre-heating tires is prohibited.

15.12 Each car competing in the Series has an allocation of 1 (one) joker tire per Event which can be used to replace any tire which has been damaged or is otherwise unusable. The use of this joker tire will be authorized by Continental. If no Joker tire is requested during an Event, this joker tire is considered to have lapsed and cannot be carried over to the next Event.

15.13 Change of Chassis & Car Number

a) Should a car change race number during the season but remain with the same Competitor, the used tires will be transferred to the new race number.
b) Not applicable
c) Should a car be transferred between Competitors, the new Competitor may choose either to retain the used tires or to be considered as a new Competitor.

15.14 At each Event, 2 (two) sets of dry tires must be purchased and registered for each entered car. Only those 2 (two) sets of registered tires or rain tires (Articles 29.7 and 29.8) may be used for qualifying and races. Tires for practice sessions will not be monitored and may be new or used carryovers from a previous event or test.

15.15 Additional tires may be purchased for use on Official test days.

15.16 There is no limitation on the quantity of wet-weather tires that can be used. The use of tires without appropriate identification is strictly forbidden.

15.17 The use of wet weather tires during any session is at the discretion of the Competitor.

DRAFT

15.18 Values for the Maximum Camber may be issued or modified before or during any Event and monitored at any time.

The maximum negative value for the camber of both rear wheels in static condition may be measured at any time during the Event, including in Parc Fermé. This figure may be changed for any Event and the changes will be published in a bulletin. Any such changes will be announced before the Event but values may be further modified by a Stewards bulletin during an Event.

15.19 Competitors may not install a Tire Pressure Management System.

15.20 Starting tire pressures may be monitored or randomly checked on both the pre-grid and / or the starting grid. Any car failing these checks must remedy the situation prior to the start of the formation lap(s). Should it be impossible to bring the pressure up to the limit on the grid, the Car must return to its working area prior to the formation lap(s) to remedy the situation.

Minimum Starting Tire Pressure:

a) Dry tires: 20 psi (1.38 Bar)
b) Wet tires: 22 psi (1.51 Bar)

16. ADMINISTRATIVE CHECKS

16.1 At each Event, USAC or a designated Official will check the licenses of all Teams and Drivers, who must sign on at the time and place detailed on the Event Schedule, as well as signing any waivers requested by USAC and approved by the Organizer. All Drivers must have authorization to compete abroad from their respective ASN. Any Driver or Team failing to complete their administrative checks during the allotted time may be reported to the Stewards. Any Driver or Team unable to attend at the given time must inform the Stewards in writing. The Organizer will ensure that he has a copy of the licenses of all the Drivers and Competitors taking part in the Event. The list of Competitors, Drivers and cars allowed to participate in the Event will be published before the start of the 1st official session. Teams and Drivers who are not in compliance are not permitted on the track.

16.2 Prior to participation in an event, an email will be sent from SRO Team Relations requesting the following:

a) Completion of SRO Team License application
b) If applicable, a copy of the front and back of the FIA Entrant license
c) Signed Continental Waiver

Prior to each event, an email will be sent from SRO Team Relations requesting the following:

a) Driver Nomination Form
b) Entry List Acknowledgement Form
c) Team Manager / Driver Briefing / Event Logistics Briefing Acknowledgement Form

The above items must be returned to SRO Team Relations no later than the close of Sporting / Admin Checks as listed in Appendix 1 for the Event Schedule.

16.3 **Driver Checks**
Prior to participation in an event, an email will be sent from SRO Team Relations requesting the following of the Drivers:

DRAFT

a) Completion of SRO License application
b) If applicable, a copy of the front and back of the FIA license with a current Medical Certificate and permission from their ASN to compete in the Event, if required
c) Certificate of completion of the Sean Edwards test
d) Completion of the Driver Info Survey
e) Signed Continental Waiver

Completion of the XLNTbrain Baseline Concussion Test

The above items must be returned to SRO Team Relations no later than the close of Sporting / Admin Checks as listed in Appendix 1 on the Event Schedule.

The following items will be completed at the track:

a) Driver weight
b) Driver Gear inspection form verification

17. SEAN EDWARDS FOUNDATION TEST

17.1 All Drivers taking part in the Series must complete the Sean Edwards Foundation assessment test prior to taking part in their first Event of the season. Furthermore, the Stewards may insist that any Driver take the test at any point during any event.

18. CREDENTIALS, ACCESS, CLOTHING

18.1 Any participant present in any capacity whatsoever in the reserved areas must wear their credential in such a way that it is clearly visible. The Organizer alone is empowered to issue credentials. The Organizer is empowered to rescind any credential. A credential may be used only by the person for whom it was intended and for the purpose for which it was issued. Any falsification or duplication of a credential, or any credential being used by other persons, will result in confiscation of the credential plus fines and/or penalties from the Organizer and/or the Stewards.

18.2 Teams may not produce or distribute additional credentials

18.3 Officials and the Organizer's representatives with Full Access credentials have access to any Team areas within the circuit boundaries. Move to credentials

18.4 Competitors may not enter Race Control, Timing & Scoring, and/or the TV broadcast compound during any Session unless directed by an Official. Move

18.5 **Credential Types**

Full Access Credential: General entrance, access to all areas including Team garages, Team working areas, starting grid and pit lane.

Driver Credential: General entrance, access to the paddock, pit lane, and starting grid. Drivers may only access the signaling wall with permission from a Pit Lane Official.

Crew Credential: General entrance, access to the paddock, pit lane and starting grid. Team members may only access the signaling wall with permission from a Pit Lane Official.

DRAFT

VIP Credential: Signifies ownership of a Team, a sponsor partner, or a Manufacturer partner in the Championship. General entrance, access to the paddock, pit lane and starting grid.

Media Credential: General entrance, access to the paddock and media center. Access to track roads and pit lane is only authorized with appropriate sticker and vest as stated in media briefing documents.

18.6 **Clothing**

18.6.1 **General**: Shorts, open toed shoes, sleeveless shirts and similar attire are prohibited in the working lane. Improper attire is subject to penalty.

18.6.2 **Crew:** In addition to the articles listed in 18.6.1, crew members must wear clean uniforms and other safe and appropriate attire to present the best possible appearance to the public. Improper attire may be subject to penalty.

18.6.3 **Drivers** competing in the Series must use a helmet which meets the FIA Standard 8859-2015, 8859-2024, 8860-2010, 8860-2018 or 8860-2018-ABP (International Sporting Code Appendix L Chapter III Article 1) with an FHR device which meets FIA Standard 8858-2010. Helmet mounted radio speakers are prohibited. Earplug-type transducers are permitted.

Drivers must use an FIA approved head restraint as specified in Appendix L to the ISC during Practice, Qualifying, Warm-up, and Races with an FHR device which meets FIA Standard 8858-2010.

Drivers participating in Practice, Qualifying, Warm-up, and Races must wear fire resistant clothing, including firesuits, gloves, long underwear, a balaclava, socks, and shoes, which meet the FIA Standard 8856-2018. Helmets and clothing must pass scrutineering before any Driver participates in a round of the Series, and/or when there is a change of any of the items which have been previously checked.

The Driver does not need to be present when his equipment is checked. Driver suits will be checked for conformity to Article 18.6.3. Driver equipment may be checked by an Official at any time during an Event.

18.6.4 **Industry support representatives** must be clearly identified with a yellow armband.

18.6.5 **Media** representatives must always wear helmets in the working pit lane unless otherwise approved.

18.6.6 Eye protection in the form of a visor or safety glasses is recommended for all personnel in the working lane.

18.6.7 Fire resistant clothing, including firesuits, long underwear, balaclava, gloves, socks, shoes, and suitable helmets are recommended for all personnel in the working lane.

18.7 The Official Series and Sponsors patches provided by the Organizer must be stitched, embroidered, or printed on the Drivers and mechanics suits in accordance with ISC Appendix L Chapter III Article 2.

DRAFT

18.8 The following armbands will be issued for use during the event:

a) White armbands for the primary Team contact.
b) Yellow armbands for industry personnel.
c) Not applicable.

18.9 No Competitors or their guests are permitted at the signaling wall without permission of a Pit Lane Official. People under 16 years of age are not allowed in the pit lane, on the pit wall, or on the grid without a proper credential. Personnel must adhere to Article 18.6 concerning clothing.

18.10 Animals, except those which have been expressly authorized for use by security services, are forbidden in the pit area, on the track, and in the paddock.

19. BRIEFINGS

DRIVER / TEAM REPRESENTATIVE BRIEFING

19.1 A mandatory Driver / Team Representative briefing, organized by the Race Director, will be held prior to Qualifying for the Event in the location specified in Appendix 1 of the Event. Virtual briefings may be substituted.

19.2 All Drivers entered in the Event and their Competitors' Official Representatives must be present throughout the briefing. Drivers are required to sign in. Any Driver unable to attend must inform the Race Director in writing prior to the briefing. Any driver that is not present at the beginning of the briefing will be considered late and is subject to penalties including monetary fines, loss of track time and other measures as determined by the Race Director.

19.3 Any absence may be referred to the Stewards.

19.4 If the Race Director determines that another briefing is necessary, the Drivers and the Competitors' Representatives will be informed accordingly of the date, time, and location.

19.5 Team Managers / Official Representatives may be requested to attend various sporting workshops and complete e-learning or online tests.

19.6 Any Driver using a mobile phone or other electronic device during the briefing for any purpose other than taking a photo of the presentation will be considered absent and will be reported to the Stewards.

LOGISTICS BRIEFING

19.7 A mandatory virtual Logistics Briefing will be held prior to each Event as per the Event schedule for the Event.

19.8 A Representative from each Team must be present throughout the briefing.

19.9 Any absence may be referred to the Stewards.

20. PADDOCK, GARAGES, PIT LANE

PADDOCK

DRAFT

20.1 The Organizer retains final authority over all paddock allocations and layout. Teams and the Series must present a professional image appropriate to a top-level racing Championship. All equipment must be kept clean, neat, orderly, and professional in appearance at all times. The Organizer reserves the right, in its sole discretion, to:

a) Deny paddock access to any Team that fails to maintain a clean and professional appearance;
b) Relocate any vehicle or structure that does not meet these standards.

Logos or branding from other race series must be fully covered and not visible within the paddock.

The application of the Graphical Charter will be enforced on all Competitor equipment.

20.2 Transporters will be parked according to the official Event schedule published by the Series. Teams who will arrive late must contact the SRO Paddock Manager or risk losing their assigned location.

20.3 Support vehicles will be given access to the paddock for unloading after all race transporters are parked. After unloading, the support trailers will be directed to a separate parking area.

20.4 Transporters may not be opened for unloading / set-up purposes prior to the time listed on the Event Schedule.

20.5 A race car must be on display for public viewing until the time listed on the Event Schedule unless approved otherwise by the SRO Paddock Manager.

20.6 All Paddock layouts are subject to approval by the Organizer. Teams are required to complete and return the SRO 2026 Paddock Layout Form by January 17, 2026 or a minimum of 30 days prior to the first event the Team will be entering. Each Team is assigned a paddock space which is no larger than required for their equipment. All transporters, liftgates, equipment, awnings, walkways, door openings, belly-box doors, slide-outs, tents, stairs, lockers, air conditioning units, generators, etc., must be contained within the maximum dimensions allotted. It is strictly forbidden for any such items to protrude into the fire lanes which must remain open and clear. Requested footprint space per the SRO Paddock Layout form is to be used for race Car preparation. The use of the team paddock space for anything other than Car preparation is prohibited unless otherwise approved by the Organizer.

20.7 Any auxiliary units such as kitchens, barbecues, or trailers used for transport must be either contained within the permitted space or be removed from the paddock to a parking area. Paddock layouts exceeding the measurement requested and approved shall be admitted at the discretion of the Organizer, which reserves the right to relocate the Competitor to a different area. Any changes to a Team footprint must be sent to brian.hughes@sro-motorsports.com via the SRO 2026 Paddock Layout Form a minimum of 30 days prior to the change taking place. Information entered on the form will be verified throughout the season.

20.8 Teams should be prepared, if requested, to reduce their paddock footprint at events where paddock space may be limited.

20.9 Consideration will be given for special requests received 45 days prior to the paddock move in date.

20.10 Entries received after the official deadline will be assigned on a space availability basis.

DRAFT

20.11 Competitors are required to secure their awnings using sufficient ballast or other means in a manner that does not damage track facilities.

20.12 Competitors are responsible for providing and/or securing their own canopy ballast.

20.13 ALL nitrogen bottles (full or empty) are to be secured in the shipping racks using the supplied ratchet straps.

20.14 Competitors are expected to abide by all regulations issued at any Event to maintain their designated work areas, including garages, paddock, and pit lane, in a clean and professional manner. Competitors must not waste water, electricity, or other resources. Oil and other liquids must be deposited in areas designated for that purpose. Nitrogen bottles must be secured at all times. Tires must be kept by the Competitor or returned to Continental when applicable. Teams are responsible for the actions of any person within their entourage. Fees incurred to remove any materials left behind by a Competitor will be billed back to the Competitor.

20.15 A "Driver / Owner" paddock for motorhome parking will be designated on a space availability basis at events.

20.16 Motorhomes, motorcoaches, stacker trailers, and campers are prohibited from parking in the paddock unless otherwise approved by the Organizer. A separate parking area will be provided for these vehicles. "Toter-homes" used to trailer entered cars are permitted provided they remain connected and in line with the trailer being pulled.

20.17 Support trailers may be permitted on a space available basis provided they are of the same basic size and type as the race transporter. Priority will be given in the following order:

1. GTWCA Teams
   a. RSP
   b. Full Season Entrants
2. GT America Teams
   a. RSP
   b. Full Season Entrants
3. Pirelli GT4 America Teams
   a. RSP
   b. Full Season Entrants
4. Toyota GR Cup & GT4 Supra Teams
5. McLaren Trophy
6. TC America Teams

20.18 Maximum overall length, including the tailgate in the horizontal position, is 90 feet. Overlength vehicles may be requested to keep the tailgate closed after unloading.

20.19 Manufacturers belonging to the Manufacturer Council will be provided a 90' x 15' paddock parking space at no charge. Manufacturers that are not members of the council will be charged a per event fee, payable in advance, prior to being assigned a paddock parking space.

20.20 Drilling, nailing, and / or screwing into any surface is prohibited unless approved in writing by the circuit.

20.21 All trailers must remain connected and in line to the tow vehicle.

DRAFT

20.22 Team garages, where applicable, will be assigned at the Organizer's sole discretion.

20.23 All Participants must use the Safety Kleen waste disposal system at each facility and follow the specific procedures and policies.

PARKING

20.24 All parking passes must be clearly displayed with the Team Name visible through the front windshield.

20.25 SRO-designated participants receive annual numbered vehicle parking passes, which remain the property of SRO Motorsports Group. The Organizer reserves the right to remove vehicles without a valid parking pass at the owner's expense. A lost or stolen pass can be replaced once per season at a cost of $500.00 USD. Possession of a parking pass does not guarantee parking availability. Misuse of a parking pass may be penalized.

20.26 Personal and/or Team vehicles with a valid parking pass displayed may only park in designated areas. No personal and/or Team vehicles may park in the paddock at any time. Designated lots and additional parking restrictions may apply as specified in the pre-event Logistics Briefing and/or Appendix 1 for the event. Any attempts to forge or replicate passes or other access documents will be reported to the Stewards.

20.27 Delivery / Service passes may be used within the paddock for delivery purposes only. Delivery passes are valid for thirty minutes and are available at SRO Registration. Delivery passes are not parking passes and must be returned immediately after use. Vehicles with delivery passes must be actively loading or unloading. Violators will be removed at owner/operator's expense and the Team will be reported to the Stewards.

20.28 Paddock banners/flags (Appendix 3) must be appropriately displayed in the Team's Paddock or Garage space during the Event.

PIT LANE

20.29 The Organizer maintains the final decision on the pit layout and pit box allocation. All equipment, including timing stands and fuel rigs, must be contained within the Team allocated space.

20.30 Entries received after the official deadline will be assigned a pit box on a space availability basis, which may include the sharing of pit boxes.

20.31 Competitors may not paint lines on any part of the pit lane. Any markings made with tape must be removed at the end of the Event by the Competitor.

20.32 Compressed air tanks, air lines, hoses, fuel barrels, refueling equipment, tools, spare parts, and any other equipment or materials must be stored within the Team allocated space and must not block fire lanes. Air/nitrogen bottles must be securely fastened. Once a protective cap has been removed from a compressed gas bottle, a protective cage must be installed around the regulators and fittings. All refillable compressed gas bottles must be fitted with a protective cage regardless of the size of the bottle.

20.33 When the number of entered cars exceeds the amount of usable pit boxes, the Competitors will share pit boxes. Teams must be prepared to share their space with other classes / series as determined by pit assignments. Teams must be considerate towards other series / classes participating in the same Event

DRAFT

and using the same pit boxes. Teams must abide by the pit box allocation document issued by the Organizer for each event with each car placed in the corresponding pit box. All Teams must use the pit box(es) assigned to them. Multi-car teams may use any pit box assigned to the Team for any Team car.

20.34 Team equipment used in the pit lane and working lane is subject to the approval of the Race Director and/or the Pit Lane Manager, whose decision is final.

20.35 The working area for each Team is in front of its pit box(s) and is the only working area for its cars in the pit lane. The limits of the area for each Team will be marked on the ground or on the pit wall.

20.36 The pit lane shall be divided into 3 (three) lanes:

a) **Fast Lane:** The lane furthest from the Working Lane where Competitors enter, transit, and exit pit lane.
b) **Transition Lane:** The lane where Competitors decelerate or accelerate safely between the fast lane and the working lane.
c) **Working Lane (Pit Box):** The designated area closest to the pit wall where work may be performed on a car.

20.37 Smoking, vaping, open flame(s) and welding are all strictly forbidden in pit lane and the Team allocated space behind the pit wall. Any device that generates sparks is prohibited in pit lane and the Team allocated space behind the pit wall.

20.38 LPG gas cylinders and accessories are prohibited in pit lane, the Team allocated space behind the pit wall, in garages, and/or under a Competitors' awning.

20.39 An inventory may be carried out in the pit lane and surrounding areas. All damage caused will be invoiced to the Competitor.

20.40 Pit Installations including folding brackets for air, fuel, lighting, or other fixtures may not exceed the width of the Team allocated space and must be a minimum of 6' above ground level. Support arms must be suspended and properly supported. Any lighting fixture must be directed towards the interior of the working area, must not face oncoming traffic, should be low-temperature, flame-proof, and must be located a minimum of 2' away from the refueling equipment. Halogen lights, sunshades, parasols, and umbrellas are prohibited.

21. OFFICIAL INSTRUCTIONS AND COMMUNICATIONS

21.1 The SRO Sporting Board, Stewards, Race Director or Sporting Director may give instructions to Competitors in the Driver Briefing, the Event Logistics Briefing, by means of special memos or bulletins in accordance with the Code and /or via the GT World Challenge America App (the Series App) These documents and/or instructions will be distributed electronically to all the Competitors, who must acknowledge receipt when requested.

21.2 The Series App is considered an Official means of communication and must be monitored throughout the Event until the final official results are issued.

The Series app can be downloaded:

a) https://world-challenge.minsh.com
b) https://play.google.com/store/apps/details?id=com.minsh.pirelli

DRAFT

21.3 All classifications, starting grids, and results of practice and the race, as well as decisions issued by the Stewards, are posted on the digital notice board. https://Teams.sro-america.com/Teams-login

21.4 All Teams are required to monitor the systems listed below during the Event:

a) Timing Monitors.
b) GT World Challenge America App (the Series App).
c) Race Control Radio Frequency (Appendix 8).

21.5 During any session in which a Competitor is participating, they must monitor the Series App and the timing monitor from Pit Lane for the duration of the session. Race Control will not respond to inquiries about other Competitors or Sporting Regulations. It is every Competitors' responsibility to understand the Sporting Regulations. Inquiries regarding the Sporting Regulations can be made directly to the Race Director or a member of the SRO Sporting Board between sessions.

21.6 Usernames for the Series App must include the name of the user as shown on their annual credential along with the corresponding car number(s). Aliases will not be approved.

21.7 Competitors must monitor the Series App throughout the Event. The Series App is not to be used for opinion or commentary. Violators will be referred to the Stewards.

21.8 All Teams must monitor the Race Control Radio Frequency which is used for communication from Race Control to the Teams. Teams must be monitoring the frequency 15 (fifteen) minutes prior to the start of each session until all of their cars have returned to the paddock at the end of the practice session or the opening of Parc Fermé for qualifying and races as applicable. Teams may not use this frequency for any other information. Teams must not transmit on this frequency. Information and / or instructions given on the Race Control Radio Frequency is in addition to the messages displayed on the timing monitor.

21.9 The Series Notice Board will be used to communicate documents and / or instructions to the Teams. Any decision or communication concerning a Competitor will be delivered to the Competitor as soon as possible.

d) https://teams.sroamerica.com/
e) http://usac.alkamelna.com/

21.10 Each Team must provide the Organizer and/or designated radio representative with the radio frequency(s) and access codes used for communication between the Team and the Driver in each car for all sessions. The designated radio representative for SRO America is Racing Radios. Each Team authorizes the Official TV production company to use selected recordings of radio conversation between the Team and Drivers. Such material may be used without limitation for the television coverage of the Event. The Officials of the Event may also listen to the conversations.

21.11 Teams must submit frequency registrations directly to Racing Radios no later than two weeks prior to their first Event and at each Event if changed. Changes during an Event must be submitted no later than two hours prior to qualifying or a Race.

21.12 Whenever a Competitor's car(s) is on the racetrack, a minimum of one Crew member must be in the Team Pit Box, must have radio communication with the Driver and must monitor the published Race Control Frequency.

DRAFT

22. SCRUTINEERING

22.1 An Annual Inspection will be performed the first time a car is presented for Scrutineering. Competitors must present an Annual Inspection homologation form for each of their cars entered in the Event. Once a car has passed the initial inspection, each car must bear an identification sticker clearly visible on the driver's side windscreen support of the safety cage.

22.2 Scrutineering of the Drivers' equipment will take place prior to the first official session of the Event in the Technical Inspection area. Failure to present Driver's equipment for inspection may prevent that Driver from participating.

22.3 Each Competitor must have all documents required by Articles 22.5 a) and 22.5 b) and the various documents relating to the car available for inspection at any time during the Event. Each team must present their homologation forms when attending initial scrutineering at each Event.

22.4 Random safety inspections will be performed throughout the Event.

22.5 Cars must be presented to Scrutineering at the time indicated on the Scrutineering Timetable in the following condition:

a) With homologation forms and the car's Annual Inspection.
b) With fuel cell and safety cage certificates.
c) Without fuel.
d) Not applicable.
e) With ballast, ready for sealing.
f) With the engine ready for sealing.
    1. Unless sealed by the Manufacturer, Competitors must drill sufficient holes in the ribs and/or two consecutive screws in the sump, cylinder head and cylinder head covers. Twisted wire must be installed on each side of the engine, coming from the sump, joining each group of screws, holes, or ribs so that these parts cannot be separated. Wire ends must be long enough to allow the plaques and seals to be affixed.
g) For cars equipped with turbo chargers, the turbo must be ready for sealing, pre-wired.
h) With identification and additional lights installed (if applicable).
i) With all mandatory stickers (technical / safety / Series sponsors) in accordance with the Graphical Charter (Appendix 3).
j) On slick tires manufactured by Continental .
k) With a functioning transponder, MyLaps Racelink, Lumirank Panel, and a Driver Information Display (DID).

22.6 The details of the car, number of seals, restrictor diameter, and all other information entered in the Annual Inspection are the sole responsibility of the Competitor. It is the responsibility of the Competitor to provide, at any time during the event, proof that his car and equipment are in conformity with the regulations, homologation, and current BOP decisions.

22.7 The removal or modification of any seal(s) during a Event must be requested in writing to the Technical Delegate prior to the seal being broken.

22.8 Not Applicable

22.9 Not Applicable

DRAFT

22.10 Not Applicable

22.11 Initial Scrutineering of the Car and Drivers' equipment along with Sporting Checks for the Competitors will take place in accordance with the Official Event Schedule. Any Competitor who has not satisfactorily completed registration and/or Sporting Checks is prohibited from participating in any on-track session. Any Driver in violation of this article is subject to a $10,000.00USD fine. Further penalties may apply up to exclusion from the Series.

22.12 Only cars with a current Annual Inspection on file are permitted to participate in any on-track session. Any replacement chassis is required to be declared as such and presented for an Annual Inspection before it is permitted on-track.

22.13 The Scrutineers may:

a) Check the eligibility of a car or of a Competitor at any time during an Event.
b) Require a car to be dismantled in a reasonable amount of time by the Competitor to confirm the conditions of eligibility or conformity are fully satisfied.
c) Require a Competitor to pay the reasonable expenses associated with any requirements of this article.
d) Require a Competitor to supply such parts or samples as deemed necessary. At the end of qualifying, and of the races, the car must contain at least 2 (two) kg of fuel. The fuel must be taken in the Parc Fermé through an FIA approved self-sealing connector, fitted immediately before the injectors (see Technical List n°5). The sample taking must be done prior to any check requiring the engine to be started.

22.14 For Scrutineering Checks, the ride height will be measured at the specified points per the Vehicle Homologation with tire pressures set at 29 psi (2.0 Bar) and the car empty of fuel.

22.15 At the end of the Qualifying session and after the finish of each Race, all Cars must proceed directly to Parc Fermé as directed by an Official. An official representative of the Competitor is required to remain with the car until released by a Scrutineer.

22.16 After Initial Scrutineering, any Car which is changed in a way which might affect its safety or call into question its eligibility, must be re-presented for Scrutineering approval.

22.17 The Race Director may require that any car involved in an accident be stopped and inspected by the Scrutineers.

22.18 The Stewards may publish the Scrutineers' findings each time a car is inspected during the Event. These results will not include any specific figures except when a car is found to be in breach of the Technical Regulations.

22.19 Scrutineering shall be performed by duly appointed Officials who shall also be responsible for the operation of Parc Fermé and who alone are authorized to give instructions to the Competitors.

22.20 No protest will be permitted for any Scrutineering procedure or confiscation of parts.

22.21 A Competitor may be called into Pit Lane or Scrutineering at any time.

22.22 Parts availability will not be taken into consideration by the Technical Manager or Scrutineers as to what components will be inspected.

DRAFT

22.23 The Stewards may impose one or more of the following penalties or a combination of penalties which they deem to be appropriate in the event of any breach of the Technical / Scrutineering regulations.

a) A time Penalty to be added to the overall elapsed time of the car.
b) A drive-through penalty where the Car must enter the pit lane and re-join the race without stopping.
c) A Stop & Go / Stop + time penalty. The Car must enter the pit lane, stop in the Team pit box for the given time and then re-join the race. No work is permitted on the Car during this stop.
d) A change of finishing position on the Final results
e) A drop of grid positions for the next race in which the Car is entered.
f) Pit Lane Start
    a. In some cases, competitors may not be permitted to participate in the relevant qualifying session
g) Probation.
h) Exclusion of the Car and/or Driver from the race, the next race, or another Event of the Series.
i) A formal reprimand.
j) A monetary fine.
k) Championship Points Reduction

23. DATA LOGGING SYSTEM AND ECU

23.1 Only sensors listed in the homologation form may be installed in the car during an event. Sensor make and type are unrestricted. Unless otherwise indicated on the homologation form, sensor use is mandatory. Sensors marked "Restricted" may only be installed and used if authorized in the relevant sporting or supplementary regulations of the Series.

23.2 The homologated Bosch data logger with any additionally requested sensors must be installed in all cars at all Events. TRD Technical Staff will check all data loggers before the first practice. Cars without loggers or with loggers which are not working correctly may be reported to the Stewards.

23.3 The data logger is used for scrutineering purposes. The reference engine data will be collected during the SRO Official BOP test, dyno-testing for homologation purposes, or collected during other tests and races with current BOP decisions.

23.4 No data may be extracted or removed from the data logger system during an official session. This will only be done by the Scrutineers or designated industry personnel in Parc Fermé. The removal, extraction, and/or manipulation (manually, electronically or in any other form) of data, the data logger, memory cards or similar storage media may be reported to the Stewards. Each Competitor is responsible for clearing their logger after Parc Fermé. Manufacturers are permitted to download in Parc Fermé after the Scrutineers.

23.5 Any component of the data logging system may be sealed at any time.

23.6 The data collected must remain at the disposal of the SRO Technical Department and the Technical Manager. The SRO Technical Department may be assisted by designated industry support Technicians to ensure the conformity of the data logging system and the various systems with which the cars are equipped. The SRO Technical Department may require the sensors to be recalibrated at any time. The SRO Technical Department may remove, exchange or control the various electronic components of a car.

DRAFT

23.7 The GPS antenna(s) of the data logger and the MyLaps telemetry unit must be mounted outside of the car on the roof unless otherwise approved. No other antenna(s) may be within 20 cm of the data logger or telemetry antennas. The SRO Technical Manager can require Competitors to remove other antennas from the roof.

23.8 The manufacturer must provide the SRO Technical Board with a reference ECU with the homologated maps, which can be placed in any of their cars competing in the Series. Each manufacturer will also supply any technical means needed to swap the ECU belonging to a Competitor with the reference ECU as supplied. The SRO Technical Board and/or the Scrutineers will not be held responsible for any consequences linked to a change of an ECU and any subsequent failure.

23.9 Each data logger will be associated with a specific chassis and will be noted as such during initial scrutineering. Any changes after that point must be requested in writing prior to the start of the event in question and agreed to by the Technical Director or the Technical Manager.

23.10 The following link must be used to report any changes, including from series to series within SRO:

https://surveys.sro-motorsports.com/to/zTghYXdF

23.11 Device failure at any time of any scrutineering related data channel(s) may be referred to the Stewards.

23.12 The homologated Vbox system and its data logging system is permitted for Competitor use.

24. WEIGHING AND MINIMUM WEIGHT COMPLIANCE

24.1 At any time during the Event, the Technical Manager or Scrutineers may select cars to be weighed.

24.2 Should the weight of a car be less than specified in the Technical Regulations for that Event, the Competitor concerned may be referred to the Stewards, save where the deficiency in weight results from the accidental loss of a component of the car.

24.3 No substance may be added to, placed on, or removed from a car after it has been selected for weighing except by a Scrutineer.

24.4 Only Scrutineers and Officials may enter or remain in the Scrutineering garage without the specific permission of the Technical Manager.

24.5 The minimum weight of the Driver in any car competing in the Series is 100 (one Hundred) kilograms (kg) with a +/- 5 kg tolerance and is not included in the minimum homologation or Technical Regulations weight of the car. Should the weight of the Driver in any specific car be less than 100 kg (+/- 5 kg), the car must carry Driver Ballast to compensate. The following procedure will be followed:

a) Each Competitor must weigh their Driver, including fire suit, underwear, shoes, gloves, helmet, and HANS, at the time of the administrative checks
b) The weight of the Driver in the car will be calculated and rounded up to the nearest integer (D)
c) If D < 100, then the Driver Ballast to be carried by the car will be 100–D (+/- 5 kg)
d) The Driver Ballast must be installed in the ballast box and sealed before qualifying

DRAFT

e) The Driver Ballast, as well as the individual weight of the Driver in question, may be checked at any point during the event.
f) If D>100, then the weight of D-100 may be removed from the minimum weight of the car (+/- 5 kg).
g) Not applicable
h) All Ballast must be installed in accordance with the applicable Technical Regulations.

ON BOARD CAMERAS

24.6 A car must carry an official on-board television camera and its equipment if so requested. The weight of the camera is included in the weight of the car as specified on the Balance of Performance sheet for that Event. All cars must be prepared to allow for the installation of the camera according to Appendix 9.

24.7 A Competitor may fit one or more personal cameras in the car with written permission from the Organizer and the Technical Manager for each camera. The installation must be presented at the time of Scrutineering. Any cameras considered unsafe will be removed. The weight of the camera equipment is not included in the minimum weight of the car as specified on the Balance of Performance sheet for that Event. Cameras affixed to helmets are prohibited.

24.8 Use of the HDMI Video output on the VBOX Video HD2 systems is prohibited.

25. TELEMETRY AND DATA TRANSMISSION

25.1 No signal of any kind may pass between a moving car and anyone associated with the Team and/or Driver with the following exceptions:

a) Legible messages on a pit board
b) Body movement by the Driver
c) Not applicable
d) Verbal communication between a Driver and his Team by radio.

25.2 Only the homologated telemetry system is permitted. No other telemetry systems are permitted. No item, installation, or antenna is permitted which may interfere at any time with the official data logger, timing, GPS, radio, or TV systems.

The following are prohibited:

a) Wireless Access Points of any type
b) Electromagnetic radiation between 2 and 2.7 GHz, except with the written permission of the Organizer.
c) Text messages from pit, paddock or garage to car
d) The use of frequencies 2.4 GHz and between 1.2 and 1.4 GHz

26. GENERAL SAFETY

26.1 Official instructions will be given to Drivers by means of the signals described in Appendix H of the Code. Competitors are responsible for observing and complying with these signals at all times and must not

DRAFT

use any flags that are similar in any way. Where flag signals are supplemented by light panels/signals/Driver Information Display (DID), these means of signaling will be deemed to have the same regulatory value.

26.2 Drivers are strictly forbidden to drive their car in the opposite direction of the Race except to remove the car from a dangerous position and in accordance with the instructions of the Marshals. A car may only be pushed to remove it from a dangerous position as directed by the Marshals. This rule is also applicable when the car is parked in Parc Fermé.

26.3 During Practice, Qualifying, and the Races, Drivers may only use the track and must respect the provisions of the Code relating to driving standards on circuits. Track limits will be defined in the Driver Briefing.

26.4 A Driver who abandons a car on the track must leave it in neutral or with the clutch disengaged and with the steering wheel in place.

26.5 Repairs to a car undertaken by team members may only be performed in the paddock/garage area, the working lane of the pit lane, on the starting grid or as provided for in Article 32. A Driver who manages to repair the Car after it has been pushed to a place of safety, with or without remote assistance from his Team, may rejoin the session.

26.6 The Competitor must supply a minimum of two charged 10lb ABC rated fire extinguishers at each individual Team pit box.

26.7 Except as specifically authorized by the Code or these Sporting Regulations, no one except the Driver may touch a stopped car unless it is in the Team's designated paddock space, in the pit lane or on the starting grid.

26.8 At no time may a Car use the reverse gear in the pit lane.

26.9 Should a Car leave the track for any reason, the Driver must rejoin safely and without gaining an advantage.

26.10 Drivers consistently exceeding track limits may be stopped during Practice sessions, may have their Qualifying time(s) invalidated, and may be penalized during the Race.

26.11 Cars found to have bypassed a portion of the circuit (shortcut) will have the relevant lap time(s) invalidated in Practice, Qualifying, and Races. Cars found to have bypassed a significant portion(s) of the circuit during a Race may be reported to the Stewards.

26.12 The requirements listed in Article 26.11 will not automatically apply to any driver who is judged to have been forced off. Each case shall be judged individually.

26.13 At the discretion of the Race Director, a Driver may be given the opportunity to give back the whole of any advantage gained by leaving the track.

26.14 When instructed by the Race Director to return an advantage gained, the advantage gained must be ceded for a minimum of two successive corners. Should the advantage not be ceded, or not ceded for two successive corners, the incident may be referred to the Stewards.

DRAFT

26.15 During the periods commencing 15 minutes prior to and ending five minutes after every Practice or Qualifying session, and the period from the commencement of the formation lap(s) preceding the Race(s) to the time the last Car enters Parc Fermé, no one is allowed on the track with the exception of:

a) Marshals or other authorized personnel in the execution of their duty.
b) Drivers when driving or under the direction of the Marshals.
c) Team personnel when either pushing a car or clearing equipment from the grid after all cars able to do so have left the grid on the formation lap.

26.16 At any time during an Event, a Driver may enter the track only after starting his engine alone and unaided using only those means available on board. Should a car receive external assistance, including the use of an external jump battery, the Team may be reported to the Stewards.

26.17 A Driver coming into the pits must not loosen or unfasten his safety harness or racing net until his car is completely stopped in the pit box. After a pit stop, the car may only start moving after the Driver's safety harness and racing net have been fastened. It is the Team's responsibility to ensure that a Driver's safety harness is properly fastened before the car leaves its working area to enter the track.

26.18 While driving in the fast lane of the pits, the Driver must have one hand on the steering wheel at all times.

26.19 The Driver must ensure that the harness and FHR are correctly positioned before leaving the working area and when the Driver is seated in the vehicle either on track or moving in the pit lane.

26.20 Extrication and Recovery exercises may be scheduled prior to the Event. Selected Teams will be notified in order to make their car available at the stated time.

DRAFT

26.21 If a Driver has mechanical difficulties during Practice, Qualifying, or the Races, he must return to his pit box provided that the car is capable of doing so at a rate that will not interfere with other competitors and will not pose a safety hazard. Otherwise, the Driver shall put the car in a safe position and stay in the car until instructed by safety workers to exit the vehicle. At no time may a car be driven unnecessarily slowly, erratically, or in a manner that may be deemed unsafe. This will apply whether any such car is being driven on the track, the pit entry, the pit lane, or the pit exit.

26.22 Drivers may not flash their headlights (main beams) as a warning or indication more than three times between any two successive corners. Any car reported to have exceeded this number of flashes will be given a warning. A second infraction for any car during the Event may result in a penalty. Automated headlight flashing programs linked to the pit speed limiter are permitted.

26.23 The Driver must drive his car alone and without external assistance from vehicles, additional people, or autonomous control.

26.24 At the end of any session or race, each Car may only cross the Control Line once.

26.25 Failure to comply with the general safety requirements of the Code or these Sporting Regulations may result in penalties up to and including exclusion of the Car and/or Driver from the Event.

27. SPORTSMANSHIP

27.1 Any incident involving the following may be reported to the Stewards who may take any action they deem suitable. The Team is responsible for the actions of all persons within their entourage.

a) Reckless behavior or provocative acts of any kind
b) Inappropriate comments on any social media network and/or the Series App
c) Unsportsmanlike behavior
d) Actions or occurrences in relation to any Event, committed by a Team member or a person under the responsibility of the Competitor, that could be considered in contravention of the SRO Motorsports America spirit

27.2 On track Driver Conduct will be viewed using these Sporting Regulations and ISC Appendix L Chapter IV (Code of Driving Conduct on Circuits) as a guideline.

27.3 **PASSING**. Should an incident occur or ensue, all Drivers actions are subject to review by the Stewards, who may penalize any Driver involved in the incident at their discretion.

27.4 **BLOCKING**. Any Driver who, in the opinion of the Race Director, or as determined by the Stewards, moves in response to prohibit a pass or pass attempt may be warned or penalized according to Articles 49 and 50 of these Regulations.

28. PRACTICE AND QUALIFYING

28.1 Except where these Sporting Regulations require otherwise, pit and track discipline as well as safety measures are the same for all sessions (Tests, Practice and Qualifying) as for the Races.

DRAFT

28.2 Prior to the start of a session, and upon the display of a red flag, cars entering pit lane must report to their pit box. Cars already in their pit box must remain there until the signal to start/restart the session is given.

28.3 Cars may only leave their working area upon the waving of the green flag to start or restart the session. Any car moving from its pit box prior to the green flag is subject to penalty.

28.4 For all Practice Session and Qualifying sessions, lap times will be recorded at the Alternate Control Line as specified in the Driver/Team Manager Briefing. Once Session time has expired, the checkered flag will be displayed at the Alternate Control Line. Cars that cross the Alternate Control Line after session time has expired are required to enter the pit lane. Any Car that does not enter the pit lane immediately after such time will be reported to the Stewards.

28.5 An Official Lap is considered from Control Line to Control Line (or Alternate Control line to Alternate Control line, if used) having, at minimum, a part of a tire in contact with the track at all times. With the exception of a lap in which a red flag is shown, each time a car crosses the Control Line (or Alternate Control Line, if used) it will be deemed to have completed one lap. Any lap time set during a red flag will be invalidated.

28.6 If a car stops on track, it must be moved to a safe location as quickly as possible so that its presence does not hinder other Competitors. If the Driver is unable to drive the car from a unsafe position, it shall be the duty of the Marshals to assist him. A car may be moved with help other than that of the Marshals (ex: wrecker, rollback, …) and re-join the session. Any car(s) that re-enters the track must join safely and without spreading debris onto the racing surface.

28.7 All cars abandoned on the track will be moved to a safe place. Any car unable to return to the pits will be returned to the paddock as soon as possible.

28.8 When the red flag is displayed, all Cars shall proceed back to pit lane (or elsewhere as directed by the Race Director) using extreme caution. Overtaking is prohibited unless in the sole opinion of the Race Director a car is driving slowly. The Official Session Clock does not stop during a red flag.

28.9 The Race Director may interrupt a session as often and for as long as he thinks necessary to clear the track and/or to allow for the recovery of a Car. The Race Director may decline to extend the session after an interruption of this kind.

28.10 Any Driver causing a stoppage and/or red flag will lose his two fastest lap times for that session.

28.11 Safety Jack Stands / Blocks

a) Must be used when a car is raised and any part of anyone's body is under any part of the car including inside of wheel wells.
b) Must be capable of supporting a car in case of a jack failure.
c) Are not required when only changing the tires/wheels.

PRACTICE SESSIONS

28.12 There will be 2 (two) practice sessions of a maximum duration of 30 (thirty) minutes each. Data will be downloaded in Parc Fermé by SRO Officials after every official session

28.13 Not applicable

DRAFT

QUALIFYING

28.14 Any Driver taking part in a qualifying session who, in the opinion of the Race Director, stops unnecessarily on the circuit or unnecessarily impedes another Driver, may be referred to the Stewards.

28.15 No Driver may take the start of either Race without completing 1 (one) timed lap (not including in and out laps) in a practice session and/or the qualifying session, except in a case of force majeure duly recognized as such by the Stewards. Drivers who set a time outside 110% of the fastest time during the relevant qualifying or practice sessions may be authorized by the Stewards to participate in the race. Permission must be requested from the Stewards for any such Driver(s) to participate in the race. Should more than one Driver be accepted in this manner, the Stewards will determine their order. No protest or appeal will be accepted regarding this matter.

28.16 Qualifying Session 1 (Q1) is for Race 1.

28.17 Qualifying Session 2 (Q2) is for Race 2.

Qualifying Procedures

For the **ARLINGTON** event only:

28.18 Drivers will line up in the Fast Lane at pit exit based on P2 Practice times (fastest to slowest). The same qualifying line-up order will be used for both qualifying sessions.

All Cars will be positioned in the correct order in pre-grid. Any Car arriving after pre-grid has closed will be placed after all Cars that have been correctly sorted. Drivers with no P2 practice times will be placed at the end of the line, behind the last Driver with a P2 practice time in the order they arrive at pre-grid.

For all other Events:

28.19 Drivers will line up in the Fast Lane at pit exit in Driver Championship points order (highest to lowest), based on the Championship standings published on the Series website.

28.20 All Cars will be positioned in the correct order in pre-grid. Any Car arriving after pre-grid has closed will be placed after all Cars that have been correctly sorted. Drivers with no Championship points will be placed at the end of the line behind the last Driver with Championship points, in the order they arrive at pre-grid.

28.21 Any Driver who goes to their Pit Box while en route to pit exit for the Qualifying Session forfeits their line-up position and will be held until all Cars have been released and have passed their pit box.

DRAFT

28.18 If for any reason the Qualifying session for Driver 1 cannot take place or is stopped before all cars in that session have the opportunity to set a time as determined by the Race Director at his sole discretion, the best time from each Driver 1 during Practice 2 will be used to set the grid for Race 1. If for any reason the Qualifying session for Race 2 cannot take place or is stopped before all cars in that session have the opportunity to set a time as determined by the Race Director at his sole discretion, the best time from each Driver 1 during Practice 2 will be used to set the grid for Race 2. If times from Practice 2 are not available, the decision as to how the grids will be formed will be made by the Stewards.

28.19 Each Qualifying session will be a maximum of 15 minutes. This article is not subject to protest or appeal.

28.20 Any Driver causing a stoppage and/or red flag during qualifying will lose his 2 fastest qualifying lap times for that session. The Driver causing the Red Flag will be prohibited from further participation in that Qualifying session. Any car(s) involved in a simultaneous or concurrent incident will be reviewed by the Stewards and is subject to penalty.

28.21 The fastest lap time set by each car in Qualifying 1 will set the grid for Race 1.

28.22 The fastest lap time set by each car in Qualifying 2 will set the grid for Race 2.

28.22.1 In the event of a dead heat within a Qualifying session, the Driver who set the time first will be classified as the fastest.

28.23 Cars must remain in the pit lane when not on the track until the end of the session where they will be directed to Parc Fermé.

28.24 At no time will a car be allowed to return to the paddock / garage areas until:

a) The qualifying session has ended and the car has been cleared from any post-qualifying Scrutineering checks.
b) The car has been released from Parc Fermé.
c) With the express permission of the Technical Manager.

28.25 From the start of each Qualifying Session through the end of each Qualifying Session, including any Red Flag stoppage(s), the following principles apply:

a) No fuel may be added to or removed from the cars.
b) Cars may only leave their pit box according to the procedure in Article 42.2. Cars may only enter the racetrack when pit exit is open.
c) No computers may be connected to the cars. Adding or removing data storage devices and/or using wireless connections of any kind from the Team/pit to the car is prohibited.

28.26 From the start of each Qualifying session through the end of each Qualifying session, including any Red Flag stoppage(s), only the following work may be performed on the car:

a) Cleaning windscreens / removal of tearoffs
b) Not Applicable
c) Not Applicable
d) Checking / adjusting tire pressures and tire temperatures
e) Adding fluid (except fuel) under the supervision of an SRO Official

DRAFT

f) Removing debris from the radiator grill

28.27 Should any other work be performed on the car, all previously set qualifying times will be invalidated.

28.28 Upon completion of the qualifying sessions, all cars are immediately under full Parc Fermé conditions. Only the qualifying Driver may drive the car from pit lane to Parc Fermé unless permitted otherwise by the Technical Delegate or the Race Director.

28.29 Should a qualifying session be interrupted, no protest or appeal will be accepted as to the possible effects of the interruption on the qualification of Drivers admitted to start.

28.30 Any car unable to return to the pits during Qualifying, will be returned to Parc Fermé as soon as possible.

28.31 Not applicable.

28.32 At the end of the qualifying session, the results will be published and posted on the Official Notice Board.

28.33 Not applicable.

29. RACE GRID

29.1 The grid of Race 1 will be created from the Official results of Qualifying 1.

29.2 The grid of Race 2 will be created from the Official results of Qualifying 2.

29.3 Once the grid has been established, grid position penalties (if any) will be applied to the Drivers in question in the order in which the decisions were issued.

29.4 The pole position will be the same position as from the previous year or, for a new circuit, as designated on the FIA circuit license. Any changes to this position will be published in a bulletin.

29.5 The starting grid lineup is in pit lane unless modified by a Stewards bulletin.

29.6 Any car unable to meet the published Pre-Grid closing time may be permitted to take up its position on the starting grid with approval from the Race Director. Such Cars must be in their starting grid position by the 5-minute announcement. Cars arriving after the 5-minute announcement must start from the pit lane.

29.7 The final starting grid for any Race will be published a minimum of one hour before the start of that Race. Any Competitor whose car is unable to start the race or who believes that his car will not be ready to start, must inform the Race Director or Technical Manager at the earliest opportunity.

29.8 If one or more cars withdraw before the Official grid is published, the grid will be closed up. Unless the Race Director has approved a car taking its original starting grid position prior to the opening of the starting grid, any gaps on the pre-grid will be closed on the starting grid.

29.9 Not applicable

DRAFT

30. STARTING DRIVERS

30.1 Only the nominated Driver may start the Race.

30.2 Not applicable

30.3 Not applicable

30.4 Any unauthorized changes will be reported to the Stewards.

31. PRE-RACE AND STARTING PROCEDURES

31.1 Only in the most exceptional circumstances can a delay or other difficulty result in a change to the starting time of a Race.

31.2 The approach of the start will be announced to Competitors at the following times:

a) Ten minutes
b) Five minutes
c) Three minutes
d) One minute
e) 15 (fifteen) seconds
f) Drivers Start Your Engine (DSYE) command

31.3 When the ten minute announcement is made, everyone except Drivers, Officials and Team technical staff must leave the grid.

31.4 When the five minute announcement is made, all Cars must:

a) Have the wheels fitted and tightened on the car.
b) Be resting on the ground.

After the 5 (five) minute announcement, only one crewmember may stay with the car on the grid. This crewmember may not touch any part the car without explicit direction from a Pit Lane official. Driver assistance is permitted.

31.5 When the one-minute announcement is made, all Team staff must leave the grid. By the 15 second announcement, all Team members and equipment must be clear of the grid. Any Driver who is unable to start must indicate this to the Pit Officials. When the remainder of the cars able to leave the grid have done so, Pit Lane Officials may push the car to a safe location where a maximum of 4 Team members may retrieve the car. Any Driver being pushed from the grid may not attempt to start the car and must follow the instructions of the Pit Lane Officials.

31.6 At 0 (zero) seconds, the DSYE command will be given. Approximately 15 seconds later, the Leading Car will be deployed and the cars will begin a formation lap(s) maintaining their starting order. During this lap(s), practice starts are forbidden and the formation must be kept as tight as possible.

31.7 Pit exit will close 90 seconds after the Leading Car crosses the pit exit loop. Any car unable to cross the pit exit loop prior to the pit exit closing must start from pit lane.

DRAFT

31.8 The number of formation laps prior to the start of the race will be listed in the Driver Briefing and/or the Supplemental Regulations / Appendix 1 for the Event.

31.9 A Safety Car may be used as the Official Leading Car for a rolling start. In this scenario, the regulations governing the start will apply to it until it resumes its Safety Car function after the start has been given.

31.10 Overtaking during the formation lap(s) is only permitted if a car is delayed behind a stopped Car when leaving its starting grid position and cannot avoid passing it without unduly delaying the remainder of the field.

31.11 Any car that stops in its pit box during any formation lap(s) forfeits its starting position and must start from Pit Lane.

31.12 Any Driver who is delayed leaving the starting grid may be given the opportunity to regain his start position during the formation lap(s) subject to Article 31.7. The Race Director will designate a point on track after which no further overtaking is permitted. If more than one Driver is affected, they must not overtake each other while attempting to resume their original starting position. Any manipulation of this procedure may lead to a penalty.

31.13 Any Driver who is delayed leaving the starting grid may not overtake another moving car if stationary and was passed by the remainder of the field. Such Drivers may only form up at the back of the line of cars behind the Safety Car subject to Article 31.7. If more than one Driver is affected, they may only form up at the back of the field in the order in which they left the grid. A gap(s) created by a delayed Car(s) is to be maintained.

31.14 Any car that stops or spins on track during the formation lap(s) forfeits the ability to retake its original position in the field and is placed at the back of the running cars in the order it arrived. A gap(s) created by a stopped or spinning Car(s) is to be maintained.

RACE START PROCEDURES

31.15 Track-specific instructions are given by the Race Director at the Driver Briefing. Cars must not overtake the Safety Car until it has exited the racetrack. Once the Safety Car has exited the racetrack, Drivers must maintain their pace and positions as on the formation lap(s) or as instructed by the Race Director and must remain in formation in their grid position until crossing the Control Line. Cars must not overtake within their starting column until they individually cross the Control Line after display of the green flag.

31.16 For all Races, lap times will be recorded at the Control Line as specified in the Driver/Team Manager Briefing.

31.17 An Official Lap is considered from Control Line to Control Line having, at minimum, a part of a tire in contact with the track at all times. Each time a car crosses the Control Line, it will be deemed to have completed one lap.

NO START / WAVE OFF

31.18 If the Starter waves off the start of a Race, no flag will be displayed at the starter stand. All flag stations shall then display a motionless yellow flag. The cars shall complete an additional formation lap at a reduced pace, reform into two columns, side by side in the same order as the original formation lap(s).

DRAFT

Drivers should anticipate a start on the next crossing of the Control Line. The Official Race Timing commences upon the first crossing of the Control Line at the end of the prescribed formation lap(s) as listed in Appendix 1.

FALSE START

31.19 A false start occurs when a Driver deviates from the instructions given at the Driver briefing and/or those given in Article 8.6 of the International Sporting Code. Gamesmanship, brake checking, and/or manipulation of the pace or starting procedure is prohibited. A missed shift, wheel spin or other unavoidable situation on the start as determined by the Race Director is conclusive.

PIT LANE START

31.20 Any car which is in the pits may start from the pits, but only under the direction of the Pit Lane Officials. It may only be moved to the pit exit with the Driver in position.

31.21 Any Driver intending to start the Race from the pit lane may not drive his car from his Team's designated pit box until the pit exit is closed and must stop single file, in the fast lane at pit exit.

31.22 Where the pit exit is after the Control Line, cars will join the race when a significant portion of the field has passed the pit exit on the first racing lap. Where the pit exit is immediately before the Control Line, cars will join the race when a significant portion of the field has crossed the Control Line on the first racing lap.

DELAYED START

31.23 Only in the following cases will any variation in the starting procedure be allowed:

d) If it starts to rain after the five minute signal but before the race is started and, in the opinion of the Race Director safety may be compromised, Competitors may be given the opportunity to change tires.
e) If the start of the race is imminent and, in the opinion of the Race Director, the volume of water on the track is such that it cannot be negotiated safely on wet-weather tires, information concerning the likely delay will be displayed on the timing monitors. Once the start time is known, a ten minute announcement will be given.
f) According to the Supplementary Regulations of the Event or by decision of the Race Director and the Organizer, a shortened starting procedure may be specified.

RACE STARTS BEHIND THE SAFETY CAR

31.24 In exceptional circumstances, the race may be started behind the Safety Car. A radio announcement, along with messages on the timing monitor will be made indicating the race will start behind the Safety Car. The Safety Car lights will be turned on. The Safety Car will leave the grid with all cars in single file following in grid order no more than five car lengths apart. There will be no formation lap and the Official Race Timing will start when the Safety Car crosses the pit exit line.

31.25 If the Race Director determines that the race should start behind the Safety Car, the start procedure and pre-race procedures may be adjusted to ensure the start will be at or near the time scheduled in the Official Timetable for the Event.

DRAFT

31.26 Any Driver who is unable to start must indicate this to the Pit Officials. When the remainder of the cars able to leave the grid have done so, Pit Lane Officials may push the car to a safe location where a maximum of four Team members may retrieve the car. Any Driver being pushed from the grid may not attempt to start the car and must follow the instructions of the Pit Lane Officials.

32. PIT STOPS

32.1 A minimum speed limit of 48 km/h will be enforced in the fast lane, and a maximum speed limit of 50 km/h will be enforced in the entirety of the pit lane. Any Driver outside of these limits is subject to penalty.

32.2 All personnel must remain behind the dashed line designating the start of the working lane until the car comes to a complete stop. The Driver change may begin once the car has stopped and the engine is switched off. Team personnel and all equipment must withdraw behind the dashed line before the car's release.

32.3 Pit stop practice is only permitted in the pit box during scheduled sessions or as otherwise listed on the Event schedule.

32.4 Should a car overshoot its pit box, it may be pushed back to its location by up to 4 mechanics, under supervision of the Pit Lane Officials.

32.5 The use of a "lollipop" sign controlled from behind the dashed line is permitted. The sign may only be used to indicate to the Driver to stop and go.

32.6 A maximum of four working mechanics may be in the working lane during a pit stop.

Additional personnel permitted:

a) Not Applicable
b) Not Applicable
c) Not Applicable
d) Support industry personnel - maximum 2 with yellow armbands.

None of the additional personnel may perform any other duty or they will be counted as 1 of the 4 mechanics.

32.7 Carry-on / backpack compressed bottles for tire changes are prohibited. Hoses, cables etc. may not be attached to the mechanics' overalls by any means. No autonomous equipment may operate without its mechanic.

32.8 During any pit stop, the Driver must switch off the engine.

32.9 For any tuning or regulating, the engine may be started with the help of an auxiliary source of energy. However, before the car is ready to rejoin the track, the engine must be switched off. A drop-start system may be used on the condition that it is used in conjunction with a positive action from the Driver. Should no such system be installed, the Driver must start the engine from his seat using only those means available on board. Should a car receive external assistance, including the use of an external jump battery, the Team may be reported to the Stewards.

DRAFT

32.10 Other than for tuning or regulating, the car's engine may be restarted only when the car is resting on all four wheels. The car must leave the working area with no external assistance unless granted permission from the Race Director.

32.11 It is the responsibility of each Competitor to release his car after a pit stop only when it is safe to do so. Cars transiting at the pit lane speed limit in the fast lane have priority over those leaving the transition lane. A Car may only leave its pit box and transition to the fast lane without slowing, stopping, or impeding another Competitor except in the case of force majeure as accepted by the Stewards.

32.12 Cars may move from the fast lane into the working lane a maximum of three pit boxes before their own pit box.

32.13 At all times during the event and when cars are allowed onto the track:

a) Visibility towards the inside of the pit box must be ensured. Nothing may be placed to prevent visual access both in the pit box, garage or under the Team awning/tent. This includes curtains, car parts, or any type of equipment.
b) Designated Officials shall have free access into the pits, garages and or Team awnings.
c) No personnel, tools or equipment may be left in the working lane during a cars release.
d) There is no limitation on the number of mechanics when the car is inside a garage or in the paddock.
e) At the start of any practice or qualifying session, cars should be in their pit box, facing race direction and parallel to the pit wall. Cars must stop parallel to the pit wall for pit stops.
f) Only licensed, properly attired Drivers may drive a car in the pit lane during any on-track session.
g) Crew members may drive a car from the paddock into pit lane prior to the start of their session. Crew members may drive a car from pit lane back to the paddock only when their respective session has ended and all running cars are back in the pit lane.

36. DRIVER CHANGES

36.1 Not Applicable

36.2 Not Applicable

36.3 Not applicable.

37. FUEL

37.1 All fuel used during the Event must be purchased on site from VP Fuels, the Official Fuel Supplier. Fuel samples will be checked, and infractions may be reported to the Stewards. The onus is on the Competitor to ensure that there are no residual traces of non-approved fuels in fuel tanks and / or systems at an event.

DRAFT

37.2 Fuel storage is prohibited under team awnings or inside of garages.

37.3 Not Applicable

37.4 Not Applicable

37.5 Not Applicable

37.6 In accordance with article 6.3 of ISC Appendix J Article 257A, the fuel cell must be equipped with the mandatory foam supplied by and installed following the directives from the Manufacturer. The full fuel circuit (including piping, hoses and refueling receptacle) must be as indicated in the homologation file and as designed and supplied by the Manufacturer.

37.7 Refuelling in the pit lane is prohibited throughout the Event. Refuelling may only take place in the Team's allocated area in the paddock under full safety procedures. Teams must abide by the paddock instructions issued at each event.

Fuel Pump Out

37.16 Competitors may be required to complete a fuel pump-out in Parc Ferme prior to scrutineering. Two crew members are required when pumping out, one to operate the fuel pump and another to operate the fire extinguisher. The fire extinguisher must be a minimum 10lb ABC rated unit. A scrutineer must also be present to confirm that the car has been adequately pumped out.

Any car that must complete a fuel pump out must use an SRO-approved closed-circuit fuel pump-out system. Fuel must be pumped into a vented 5-gallon jug equipped with visible volume markings. The use of a dump can, or any unvented container is prohibited. A bowser may be used in lieu of a 5-gallon jug; however, the pump-out hose must be equipped with a DeatschWerks 6-02-0225-B (-6AN) dry-break quick-disconnect. Teams may be required to remove the bowser's internal tank to allow verification of the bowser's scale using a certified test weight to confirm accuracy.

The SRO-approved pump-out system shall consist, in upstream-to-downstream order, of a DeatschWerks 6-02-0225-B (-6AN) dry-break quick disconnect, a clear fuel rated braided hose, and a

DRAFT

5-gallon jug lid. The pump out system must be connected to the cars existing pump out hose. No other quick-disconnect fittings are permitted."

38. TIRE CHANGES

38.1 Only pressurized air or nitrogen can be used to fill the tires or operate the air guns.

38.2 Tire changes may only be carried out on the car in the Team pit box while parallel to the pit wall.

38.3 Personnel for Tire Changes:

a) A mechanic may bring and connect the air hose to the air jacks. This mechanic is counted as one of the four permitted in the working lane.
b) Once the car has stopped in the pit box with the engine off, a maximum of two mechanics may enter the work area to:
    1. Carry the new wheels / tires into the working area.
    2. Perform the tire change operation using:
        i. One pneumatic wheel gun or
        ii. One torque wrench
        iii. Two pneumatic wheel guns or two torque wrenches may be used for multiple lug bolt patterned wheels.
    3. Carry all wheels / tires and equipment behind the dashed line designating the start of the working lane or behind the pit wall. Rolling or throwing of wheels, tools or equipment is prohibited.
c) Only the same two mechanics may change tires.
d) A mechanic may clean or remove a tear-off film from the windscreen, clean exterior lights and remove debris from the radiator grille.
e) Any other Team member(s) in the working area will be considered as working on the car and will be counted as a mechanic(s) as will a Driver or Driver Assistant if he performs any work on the car or assists a mechanic.
f) One Industry tire technician and one Industry brake technician external to the Team may, without intervening or working on the car, conduct visual checks, temperature checks and tire pressures. They must wear a yellow armband in accordance with Article 10.8.

38.4 Battery powered wheel guns are permitted in the pit lane during Official sessions.

38.5 Team personnel and all equipment must withdraw behind the dashed line before the car's release. 'Personnel' includes mechanics, industry, or other pit stop personnel.

39. OTHER OPERATIONS IN THE PITS

39.1 A maximum of four mechanics may be in the pit box working area for maintenance, topping up liquids (other than fuel), making repairs or any other operation.

39.2 Repairs on pit lane must be completed in a timely fashion or the car must be returned to the paddock. Work on the car may continue in the paddock without personnel restrictions.

DRAFT

39.3 Any other Team members standing in the working lane will be considered as mechanics and working on the car, as will a Driver if he performs any work on the car.

39.4 One 'tire' technician and one 'brake' technician external to the Team may, without intervening or working on the car, proceed to conduct visual checks as well as with a temperature probe or pressure gauge. They must wear an armband in accordance with Article 10.8.

40. DRIVING TIME AND MANDATORY DRIVER CHANGE PIT STOPS

40.1 There are no mandatory pit stops or pit windows.

40.2 Not Applicable

40.3 Not Applicable

40.7 Not Applicable

40.8 Not Applicable

40.9 Not Applicable

41. RACE PROCEDURES

41.1 A Race will only be stopped if, in the sole discretion of the Race Director, conditions are deemed unsatisfactory.

41.2 The Race Director, at his sole discretion, may close the pit entrance at any time and for any duration. Any car that undertakes service in a closed pit lane may be referred to the Stewards.

41.3 During the race, Drivers leaving the pit lane must stop for a red flag or red light at the pit lane exit (Article 46.18) and follow the directions of the Pit Lane Official.

SAFETY CAR / FULL COURSE YELLOW (SC/FCY)

41.4 Should it be necessary for safety reasons, the Race Director will declare a Safety Car / Full Course Yellow period (SC/FCY). Double Yellow Flags will be shown around the track in accordance with FIA Appendix H, and Article 55 of these regulations.

41.6 The Official time of the SC/FCY shall be as recorded in the Timing and Scoring system.

DRAFT

41.7 The message "SC" will be shown on the "Driver Information Display" (DID) and on the timing monitors. The announcement "Safety Car" or "Full Course Yellow" will be given on the Race Control Radio Frequency.

41.8 A Safety Car / Full Course Yellow period will be deemed to be in operation simultaneously from the moment:

a) A Safety Car / Full Course Yellow announcement is declared on the Race Control Radio Frequency
b) Or is displayed on the timing monitor
c) Or is displayed on the DID
d) Or double yellow flags are displayed around the racetrack
e) Or yellow lights are displayed around the race track

41.8 All cars must slow to a speed consistent with safety. Overtaking, except for safety reasons accepted as such by the Race Director or Stewards, is prohibited. Cars must proceed at a constant speed in single file unless otherwise instructed by the Race Director.

41.9 The Safety Car is clearly identified with a flashing light system. It may be deployed to neutralize the Race at the discretion of the Race Director. The primary purpose of the Safety Car is to create a traffic interval on the racetrack so that responders may handle situations safely and quickly. It may also be used to lead formation lap(s) prior to the start of a race.

41.10 The Safety Car may be deployed at any time during a race to correct a hazardous situation. Drivers are advised that a Safety Car has been deployed when all Marshal posts display two motionless yellow flags and/or yellow lights. Upon commencement of the SC / FCY period, it is essential that all cars catch up with the field as quickly as possible, consistent with safety. The expectation is that all cars circulate with the understanding that:

a) There is an incident having necessitated the SC / FCY.
b) There are likely emergency vehicles in motion around the circuit.
c) Cars are expected to pack up to facilitate the clean-up and recovery.

41.11 Overtaking is prohibited anywhere on the racetrack. Whenever possible, the Safety Car (with its lights on) will enter the racetrack ahead of the overall leader, who must slow to Safety Car speed as directed by Race Control to facilitate this or is subject to penalty. All Competitors must follow the Safety Car in single file. A Driver may not overtake the Safety Car unless specifically instructed to do so. This procedure may be modified at the Race Director's discretion.

SC / FCY OPERATION

41.12 Safety Car / Full Course Yellow will be announced over the Race Control Frequency

a) Not applicable
b) The Safety Car will endeavor to pick up the overall leader at the time of the SC / FCY. If the Safety Car picks up a Car that is not the overall leader, the Race Director may instruct a wave-by of all Cars between the Safety Car and the Overall leader. When instructed, such Cars must overtake the Safety Car on the right and proceed around the racetrack as quickly as possible (consistent with safety), remaining in single file order.
c) Not applicable.
d) Not applicable

DRAFT

41.13 Not applicable

41.14 Medical and/or rescue vehicle(s) may be dispatched at any time during an SC / FCY. Competitors must respect all vehicles and staff by leaving them room to work. Tire scrubbing is prohibited in any response area.

41.15 The Race Director may, at any time, direct Cars to overtake other car(s) failing to achieve and/or maintain Safety Car speed. This procedure may be modified at the Race Director's discretion.

41.16 The Race Director may direct the Safety Car to use the pit lane. All cars must follow it into the pit lane without overtaking. Any car entering the pit lane under these circumstances may not stop at its designated pit box except for emergency service.

41.17 Overtaking the Safety Car is permitted only when instructed by Race Control and must be done on the right-hand side, unless Race Control specifies otherwise.

41.18 Cars may enter pit lane while the Safety Car is on course. A red flag or red light at Pit Exit indicates the pit exit is closed. Failure to stop for a red light / red flag may be referred to the Stewards.

41.19 The pit exit will be closed from the time the Safety Car is perpendicular to the Pit Box closest to pit exit until a significant portion of the field has passed the pit exit. Cars will be released to join the back of the line behind the Safety Car at the sole discretion of the SRO Officials.

41.20 Should any cars remain between the Safety Car and a Class Leader, the Race Director (at his sole discretion) may instruct a wave-by prior to the Restart. Such wave-by would be solely to ensure a Class leader is the first car in line behind the Safety Car. Cars eligible for the additional wave-by shall be instructed via an announcement on the Race Control frequency to pass the Safety Car. Should the identified Class leader behind the Safety Car then stop on the circuit, enter the pit lane, or otherwise no longer be behind the Safety Car, the race will restart with the next car in line, regardless of position.

41.21 Once the Race Director has determined that the Circuit is prepared to resume racing, the pending Restart will be announced. The Safety Car will extinguish its flashing lights indicating the final lap of the SC / FCY period. Yellow flags will be withdrawn. The Safety Car may accelerate away and exit the racetrack.

41.22 The Car immediately behind the Safety Car must maintain the previous speed of the Safety Car until the designated restart location. All cars must remain packed up, in their proper order, in single file, until the green flag is displayed. Once the green flag is displayed, the Race will resume. Cars may overtake upon display of the green flag. Any manipulation of this pace or procedure may be penalized as a failure to follow the restart procedures. Cars observed to be overtaking prior to the green flag may be reported to the Stewards.

41.23 For a restart, the pit exit closes from the time that the Safety Car enters the pit lane until a significant portion of the field has passed the pit exit The pit exit may close momentarily to facilitate the dispatch of the Safety Car if necessary.

41.24 Each lap completed while the Safety Car is deployed is counted as a race lap.

41.25 Any signal given for pit entry is independent of any signal given for pit exit.

DRAFT

41.26 The restart is not dependent upon the location of the "Wave By" cars.

42. SUSPENDING AND RESUMING THE RACE

42.1 Should it become necessary to suspend the race, the Race Director will order red flags to be shown at all Marshal posts and at the Control Line. A radio announcement, along with messages on the timing monitor, will be made indicating the race has been suspended.

42.2 When the red flag is displayed, cars must slow to a safe speed as directed by Race Control. Overtaking is prohibited. The pit exit will be closed.

a) If the red flag is weather related, all cars will be instructed to report to their pit box. All cars are under Parc Fermé conditions and no Team member may approach the car.
b) If the red flag is not weather related, all cars will be directed to a designated point in the pit lane where they must stop behind the Safety Car in single file. All cars are under Parc Fermé conditions and no Team member may approach the car.

42.3 While the race is suspended:

a) Team members are prohibited on the grid.
b) Race Control will provide further instruction of what services may be performed.

42.4 Working on a car is prohibited, unless authorization is given from Race Control, who may authorize visual checks on tires, covering the car in case of rain and the use of a maximum of two fans to cool the brakes. If authorized, this may be carried out by a maximum of two Team members.

a) Any car(s) which was in the pits before the signal to suspend the race was given is also under Parc Fermé conditions and all work must stop when the red flag signal is given.
b) Any car(s) which entered the pit lane from the paddock after the red flag signal was given must proceed to its pit box under Parc Fermé conditions. The car may move to pit exit when the grid has vacated pit lane where it will be held by a red flag/light. The Car will receive a green flag/light when a significant portion of the field has passed the pit exit line after a successful restart. This also includes any car pushed off the grid after the ten minute board.

42.5 If the race cannot be resumed, the final classification will be based on the running order of the last scored lap preceding the display of the red flag, provided the car(s) that caused the red flag is placed at the end of such classification.

RESUMING THE RACE

42.6 The delay will be kept as short as possible and as soon as the resumption time is known, Teams will be informed via the timing monitors, the Series App, and the Race Control Frequency.

42.7 The approach of the re-start will be announced to Competitors at the following times:

a) Ten minutes
b) Five minutes
c) Three minutes
d) One minute
e) 15 seconds
f) Drivers Start Your Engine (DSYE) command

DRAFT

42.8 The Race Director may authorize a tire change from slick to wet-weather tires. If authorized, this must take place between the ten and five minute announcements.

42.9 From the ten minute announcement, the cars on the grid remain under Parc Fermé conditions with the following work being permitted. Team members may:

a) Assist the Driver
b) Check tire pressures and temperatures
c) Check brakes
d) Connect an external jumper battery for the sole purpose of restarting the engine
e) Change tires (if authorized by the Race Director)

42.10 A Team may, with permission from the Race Director, remove a car from the grid. In this case, they will be allowed to rejoin the race with the cars according to Article 42.4.b).

42.11 When the five minute announcement is made, all cars must:

a) Have the wheels fitted and tightened on the car.
b) Be resting on the ground.

42.12 After the 5 (five) minute announcement, no team, staff, or crewmember may touch any part the car without explicit direction from a Pit Lane official. Driver assistance is permitted. After the five minute announcement, only one crewmember may stay with the car on the grid. This crewmember may not touch any part the car without explicit direction from a Pit Lane official. Driver assistance is permitted.

42.13 When the one minute announcement is made, all Team staff must leave the grid. By the 15 second announcement, all Team members and equipment must be clear of the grid. Any Driver who is unable to start must indicate this to the Pit Officials. When the remainder of the cars able to leave the grid have done so, Pit Lane Officials may push the car to a safe location where a maximum of four Team members may retrieve the car. Any Driver being pushed from the grid may not attempt to start the car and must follow the instructions of the Pit Lane Officials.

42.14 The Safety Car will lead the cars in the order in which they stopped behind the red flag line, with the cars no more than five car lengths apart. After the last car in line behind the Safety Car crosses the pit exit timing loop, any cars which were in the pit lane before the red flag may then enter the track and join the line of cars behind the Safety Car under the direction of a Pit Lane Official. Cars which entered the pit lane from the paddock after the red flag may move to the end of the pit lane and rejoin after the first lap behind the Safety Car.

42.15 In the event of a weather-related stoppage, Cars will be released from their pit boxes at the direction of Race Control and will form up behind the Safety Car in the order established prior to the Red Flag.

42.15 The race will be resumed behind the Safety Car. Any car that stops or spins on track when behind the Safety Car forfeits the ability to retake its original position in the field and is placed at the back of the running cars in the order it arrived. The Safety Car will enter the pits when the Race Director determines it is safe to resume the race.

42.16 Not applicable

DRAFT

42.18 Not applicable

43. FINISH

43.1 The leader will be shown the checkered flag when he crosses the Control Line at the end of the lap during which the prescribed time period ends, or sooner if the Race Director determines that circumstances exist that require the checkered flag to be shown earlier. If the leader stops prior to the Control Line, the checkered flag is presented to the next-best placed car running on the track.

43.2 If for any reason (other than when a race is aborted or suspended in accordance with Article 43.1, the checkered flag is displayed to the leading car prior to the expiration of the prescribed time, the race will be deemed to have finished upon display of the checkered flag.

43.3 If for any reason the checkered flag is displayed to a car other than the leading car before the expiration of the prescribed time, the race will be deemed to have finished when the leading car last crossed the Control Line before the checkered flag was displayed.

43.4 Any car taking the checkered flag in Pit Lane (not on the racing surface) will not be credited with completion of that lap.

43.5 After receiving the checkered flag, all classified cars must proceed directly to Parc Fermé without delay unless directed to the podium by an SRO Official, without receiving any object whatsoever and without any assistance except that of the Marshals if necessary.

43.6 Any classified car which cannot reach the Parc Fermé under its own power will be placed under the exclusive control of the Marshals, who will direct the car to the Parc Fermé.

43.7 In the case of a dead-heat, defined as two or more Cars crossing the Control Line at the same time as registered in the Timing System, visual confirmation may be used to identify the winning Car. In the absence of conclusive images or video, the winner will be deemed to be the Car that started the Race further back on the Starting Grid.

44. PARC FERMÉ

44.1 Only the Officials responsible for supervision may enter Parc Fermé. No intervention of any kind is allowed there unless authorized by such Officials. Credentialed Continental representatives may enter Parc Fermé to check tire pressures. Entrant crew members are forbidden from remaining inside Parc Fermé once the car has stopped. A representative for each Entrant must remain available to the Scrutineering Officials while the car is in Parc Fermé.

44.2 When Parc Fermé is in use, the area between the Control Line and the Parc Fermé entrance will be considered Parc Fermé as well.

44.3 Parc Fermé shall be sufficiently large and secure so that no unauthorized persons can gain access to it.

44.4 Unless otherwise specified, Parc Fermé will last for a maximum of one hour from the checkered flag for the qualifying session or either race. After this time, any cars which have not been chosen for further examination by the Technical Manager or ordered by the Stewards will be released.

DRAFT

44.5 All Car electronics must remain powered on in Parc Fermé until all Cars have been downloaded. Under Scrutineer supervision, Teams may switch off ancillary systems (e.g., chill-out systems, helmet blowers, etc.); however, the data logger must remain powered on at all times.

45. RESULTS

45.1 The car placed first will be the one having covered the greatest distance in the scheduled time. Results are based on the number of laps completed and, for those which have completed the same number of laps, the order in which they crossed the Control Line.

For the purposes of this article only, the scheduled time means the period from the Official race start time up to and including the showing of the checkered flag in accordance with Article 48.1.

45.2 If a car takes more than twice the time of the winner's fastest lap to cover its last lap, this last lap will not be counted when calculating the total distance covered by that car.

45.3 The final results will be published and posted by the Organizer on the Official Notice Board as soon as possible after the race. These will be the only valid results, subject to any amendments which may be made under the Code and these Sporting Regulations.

46. PODIUM CEREMONY AND PRESS CONFERENCES

46.1 There will be a podium ceremony after every Race. The Drivers finishing in 1st, 2nd and 3rd positions and Drivers who have secured the Hard Charger Award, Endava Highest Finishing Legend, WWEX Group Highest Finishing Legend and a representative of the winning Team must attend the prize-giving ceremony on the podium and abide by the podium procedure determined by the Organizer.

46.2 There will be a second podium ceremony at Circuit of Americas, Road America, and Indianapolis Motor Speedway for the Legends drivers finishing in 1st, 2nd, and 3rd, position in the Legends Cup. A representative of the winning Team must attend the prize-giving ceremony on the podium and abide by the podium procedure determined by the Organizer

46.3 The Competitors and Drivers agree to comply with the instructions regarding the podium ceremony. Any infringement may result in penalties at the discretion of the Stewards.

46.4 If so requested, Drivers must proceed to the Press Conference in the media center or other location specified in Appendix 1.

46.5 Any Competitor who is absent from any podium ceremony or press conference may be reported to the Stewards.

46.6 After the podium, the Drivers must remain available for at least one hour for TV and Media interviews or any other activity specified in the Appendix 1 of the Event.

46.7 The following Drivers must proceed to the Press Conference

a) 1st, 2nd, 3rd

46.8 For the final round of the season, the Champions must proceed to the Press Conference.

DRAFT

46.9 The Team Managers are responsible for ensuring that their Drivers fulfill their obligations. Any Competitor who is absent may be reported to the Stewards.

46.10 Teams and Drivers are obliged to take part in any media activities listed on the Event Schedule for the Event. Any Driver or Competitor who is absent may be reported to the Stewards.

47. CHAMPIONSHIP POINTS

47.1 Points classifications will be published on the Series website after each Event. Any disputes concerning point attributions will be decided by the Sporting Board. Any queries or challenges concerning point attributions must be submitted to the SRO Sporting Director within 14 days of the first publication of the points in dispute. The point classifications will be considered final 14 days after the last Event of the season and subject only to any ongoing judicial or sporting matters. From that point, no further amendments or corrections will be made.

47.2 Points for all titles are awarded, overall and in each category at each race at each Event to eligible Competitors according to the following scale:

Position	1st	2nd	3rd	4th	5th	6th	7th	8th	9th	10th
Points	25	18	15	12	10	8	6	4	2	1

47.3 In all cases, Team points are awarded to the Competitor, as designated by the license-holder, independent of the commercial Team name.

47.4 If a race is suspended under Article 42.5 and cannot be resumed then the following applies:

a) Zero points will be awarded if the leader has completed less than two laps.
b) Half points will be awarded if the leader has completed two or more laps, but less than 50% of the Official race time.
c) Full points will be awarded if the leader has completed more than 50% of the Official race time.

Dead Heats

47.5 Prizes and points awarded in accordance with the results to Competitors who tie will be added together and shared equally.

47.6 If two or more Drivers or Teams finish the season with the same number of points, the higher place in the Series shall be awarded to:

a) The holder of the greatest number of first place finishes.
b) If the number of first places is the same, the holder of the greatest number of second place finishes.
c) If the number of second places is the same, the holder of the greatest number of third place finishes, and so on through the points scoring positions until a winner emerges.
d) If the above-mentioned procedure fails to separate 2 (two) or more Drivers, then whoever finishes ahead in the final race of the respective season will be deemed to have finished ahead of the other in the Series.
e) Special case: Drivers of the same car, who have formed the same Driver line-up during all the Events in the Series in which they have scored points, and who finish with the same number of

DRAFT

points, will share the same place in the Series. Examples: Drivers 1 and 2 of car A will share first in the results of the Series; Drivers 1 and 2 of car B will share second, and so on until the last Driver line-up finds itself in this situation.

48. THE TITLES

48.1 **The Team Championship** will be awarded to the Team which has scored the highest number of points based on the results obtained by the best-placed car of each Team in the Races run according to Article 5.2 using the points table in Article 7.2 . Any other car entered by that Team in the Championship will not be eligible for Team Championship point scoring purposes.

48.2 **The Drivers Championship** will be awarded to the Driver(s) who has scored the highest number of points based on his results during the Races run according to Article 5.2.which has scored the highest number of points in the Events run according to Article 5.2 using the points table in Article 7.2.

48.3 Not applicable

48.4 Not applicable

48.5 Not applicable

48.6 Additional Trophies may be awarded each year. This list may be amended or altered by a bulletin from the Series.

48.7 **Race Awards**

a) Continental Pole Award
The Continental Pole Award is awarded to the Driver who sets the fastest qualifying time for each Race.

b) Endava Highest Finishing Female
The Endava Highest Finishing Female Award is awarded to the Female Driver who scores the highest number of points in each Race.

c) WWEX Group Highest Finishing Legend
The WWEX Group Highest Finishing Legend Award is awarded to the driver 40 years of age or older who scores the highest number of points in each Race. If a driver is 39 years old, turning 40 years old during the season, they are eligible for the award.

d) Fastest Lap
The Fastest Lap Award is awarded to the Driver who sets the fastest lap time in each Race.

e) Hard Charger
The Hard Charger Award recognizes the Driver who makes up the most positions during the race. In order for an Entry to be eligible for the Hard Charger Award, the Entry (Car or Driver) must have registered a qualifying time and must not have received any form of grid position penalty.

f) WWEX Group Legends Cup
The WWEX Group Legends Cup Award is awarded to the top three highest finishing drivers who meet the Legends requirement during the five events (ten races) listed below:

DRAFT

Arlington
Sonoma
Circuit of the Americas
Road America
Barber

48.8 **Seasonal Awards**

a) Endava Fastest Female

This award is presented to the Fastest Female Driver who has scored the highest number of points based on her results during the Races run according to Article 5.2

b) WWEX Group Fastest Legend

This award is presented to the Fastest Legend Driver who scored the highest number of points based on their results during the Races run according to Article 5.2. A Legend Driver is 40 years of age or older. A legend driver can also be 39 years old if turning 40 years old during the season.

c) WWEX Group Legends Cup Champion

This award honors the Legend driver who scores the highest number of points during the five Legends Cup events: Arlington, Sonoma, Circuit of the Americas, Road America, and Barber.

Each Legend Driver may drop their lowest-scoring Event from their Championship points total.

~~c)~~d) Rookie of the Year

A Driver is classified as a Rookie in the series if, prior to the start of the calendar year in which the season begins, they have competed in no more than six (6) professional closed-wheel road races, including GR Cup, throughout their career. The Organizer retains exclusive and final authority over eligibility determinations, which shall be conclusive.

The Rookie of the Year award is presented to the highest-ranking Rookie Driver in the GR Cup Driver Championship standings at the conclusion of the season.

~~d)~~e) Crew of the Year

This award Honors the Crew/Team that their peers felt were the most successful within the series. It does not have to go to the winner of the series. Each Team within the Series may vote once prior to the last event. The Crew with the most votes will be announced at the series awards banquet. Teams voting for their own Team will not be counted towards the final votes.

49. INCIDENTS AND SANCTIONS

49.1 "Incident" is defined as any occurrence or series of occurrences involving one or more Drivers and/or Team members, or any action by any Driver and/or Team member, which is reported to the Stewards by the Race Director which:

a) Necessitated the stopping of an official practice or qualifying session or the suspension of a race under Article 47.5

DRAFT

b) Constituted a breach of these Sporting Regulations or the Code.
c) Caused a false start by 1 (one) or more cars.
d) Caused a collision.
e) Forced a Driver off the track.
f) Prevented a legitimate overtaking maneuver.
g) Impeded another Driver.
h) Caused a pit lane infringement.

49.2 Drivers are solely responsible for avoiding physical contact between Cars on the racetrack.

49.3 Any Incidents involving more than one car may be investigated immediately or reviewed after the relevant session or race. Any such Incident which results in at least one of the cars being unable to continue will be automatically placed under investigation.

49.4 It shall be at the discretion of the Stewards to decide, upon a report or a request by the Race Director, if Drivers and/or Team members involved in an Incident shall be penalized.

49.5 The Race Director, in his sole judgement, may:

a) Extend an opportunity for a competitor to relinquish any advantage gained.
b) Assess Drive Through penalties.
c) Assess Stop and Go penalties.
d) Assess Stop plus time penalties.
e) Delete or invalidate lap times.
f) Assess Time Penalties.

for the following situations without input or involvement of the Stewards:

a) Track Limit Violations.
b) Pit Lane Violations including speed limit violations.
c) Blocking.

49.6 If an Incident is under investigation by the Stewards, a message informing all Teams which Car(s) is involved will be displayed on the timing monitors. Failure to display notification that an Incident has been placed under investigation will not invalidate that investigation or any subsequent decision and/or penalty.

49.7 Any Driver involved in an Incident or any other matter under investigation by the Stewards, and having been informed of this by the Stewards within 30 minutes of the checkered flag, must remain available to the Stewards.

49.8 The Stewards may impose one or more of the following penalties, simultaneously if applicable and/or in substitution or in addition to other available penalties, on any Driver involved in an Incident:

a) A time Penalty to be added to the overall elapsed time of the car. Should the time penalty to be applied after a race be longer than the time of a lap, this may be converted to a penalty of deleting a number of whole laps, as determined by the Stewards, with any remaining balance of time then applied as a time penalty. In the case that a race is red-flagged and cannot be resumed before a penalty has been served, the penalty time will be added to the elapsed race time of the car concerned.
b) A drive-through penalty where the Car must enter the pit lane and re-join the race without

DRAFT

stopping.

c) A Stop & Go / Stop + time penalty. The Car must enter the pit lane, stop in the Team pit box for the given time and then re-join the race. No work is permitted on the Car during this stop.
d) A change of finishing position on the Final results
e) A drop of grid positions for the next race in which the Driver is entered.
f) Pit Lane Start
    a. In some cases, competitors may not be permitted to participate in the relevant qualifying session.
g) Probation
h) Exclusion of the Driver from the race, the next race, or another Event of the Series.
i) A formal reprimand.
j) A monetary fine.
k) Championship Points Reduction

49.9 Should any penalty under Article 49.8 b) or c) be imposed and/or notified after the end of the race, or cannot be imposed for any operational reason, the penalty may be converted to a time penalty which will be added to the overall elapsed time of the car concerned as determined by the Stewards. The time added to the overall elapsed time for a post-race/unserved penalty shall be the published Drive Through Delta time plus 5 seconds, plus any additional time penalty if applicable.

49.10 Incidents occurring during a practice session may result in a penalty during that session or the next session, including the qualifying session. Should an Incident occur without the possibility for the penalty to be served prior to the Race, the penalty may be converted into a fine.

49.11 Incidents occurring during a qualifying session may result in:

a) The invalidation of lap times by the Race Director or Stewards,
b) A drop of positions on the starting grid (the number of positions to be decided by the Stewards)
c) A Pit Lane Start.

49.12 The Stewards may use any video or electronic means to assist them in reaching a decision.

49.13 SRO Motorsports America uses only the official resources available to Race Control for officiating purposes. Third-party video, anecdotal observation or public statement is invalid evidence unless specifically requested by the Race Director or the Stewards. Officials and other members of Race Control may be requested by the Stewards to provide input.

49.14 Where the Stewards consider that they are able to make a decision during a race without reference to images from any on-board camera, the availability of such images to a Competitor after the race will not be deemed to constitute the discovery of a significant and relevant new element in relation to any subsequent petition for review of that decision under ISC Article 14 unless such images are requested by the Stewards.

DRAFT

49.15 Should the Stewards decide to impose one of the penalties provided for in Article 16.8 (b) or (c), the `following procedure shall be applied:

a) From the time a decision is posted on the timing monitors, the relevant car may not cross the Line on the track more than 2 (two) times before entering the pit lane and, in the case of a penalty under Article 16.8c, proceeding to their pit box where it shall remain for the period of the time penalty. Unless specified otherwise by the Stewards, Stop and Go and Stop plus time penalties are to be served in the respective Team's pit box. Teams are responsible for ensuring that the car stops for the period notified.
b) Unless the car was already in the pit entry (as defined in the Driver Briefing for the Event) for the purpose of serving its penalty, it may not carry out the penalty after the Safety Car or Full Course Yellow procedures have been implemented. The number of times the Driver crosses the Line behind the Safety Car or during a Full Course Yellow procedure will be added to the maximum number of times he may cross the Line on the track.
c) While a car is stationary in the pit box serving a penalty, it may not be worked on.
d) If the engine stops, it may be started after the penalty period has elapsed, respecting Article 33.15. If the Driver is unable to start his car alone and unaided, it may be evacuated to its paddock space / garage by its mechanics.
e) When the time penalty period has elapsed, the Driver may re-enter the track.
f) No penalty may be served by a Team until it has been officially notified on the timing monitor or via the Series App.

49.16 The Stewards may impose any penalty or combination of penalties which they deem to be appropriate in the event of any breach of regulations. The Stewards may suspend any penalties at their discretion.

49.17 If a Team's car is directly involved in an incident, a "Request to Review" may be sent via the Series App detailing the incident. No such requests will be accepted after all cars have returned to pit lane at the end of any session or race. The request must include all pertinent details or it will not be considered for review by the Race Director.

49.18 Nothing in these regulations shall preclude the Stewards from referring any matter to the appropriate ASN for consideration of further penalty in accordance with the Code should the Stewards consider that a penalty beyond their powers may be merited in any instance.

49.19 The decision of the stewards is immediately binding, even in the event of an appeal, if it concerns a breach of Article 27.1 (Sportsmanship).

49.20 The Race Director, the Clerk of the Course, or the Chief Medical Officer can require a Driver to undergo a medical examination at any time during an Event.

PROCEDURAL PENALTIES

49.21 Fines, loss of track time, or any other penalty befitting an infraction may be imposed for items relating to the conduct of a Driver and/or a Team member having no direct sporting implication. Examples include missing and / or late to a mandatory briefing, unauthorized vehicles in paddock, or any other items considered by the Organizer to fall under this category. Any sums paid as fines will be placed in the SRO Motorsports Fund as authorized by USAC further to article 12.7.3 of the International Sporting Code. Fines may be accompanied or replaced by an obligation to accomplish some work of public interest in accordance with article 12.3.1.c of the International Sporting Code. Procedural penalties will be assessed by the Organizer and cannot be protested or appealed.

DRAFT

49.22 Should any Car be assessed a penalty by the Stewards or Sporting Board that moves the Car to last in class, the Car shall not be classified in the Final results.

50. WARNING POINTS

50.1 Drivers involved in Incidents of any kind, or who have been reported for sportsmanship or driving standards, may, in addition to their penalty, have Warning Points (WP) administered by the Stewards.

50.2 The following scale may be used as a guideline by the Stewards:

Incident responsibility – all cars continue from the incident scene	0 - 3 Warning Points
Incident responsibility – 1 or more cars fail to continue from the incident scene	3 - 5 Warning points

50.3 Other offenses may incur Warning Points as decided by the Stewards. Warning Points will only be administered to Drivers for their own actions, not those of the Team or Team-mates. The number of Warning Points imposed will be listed on the Decision of the Stewards.

50.4 The number of Warning Points will be calculated per Driver.

a) Any Driver accumulating 5 or more Warning Points will receive a minimum of a pit lane start for the car in which he is driving to be applied at the next race of the same Championship in which the 5th Warning Point was assessed.
b) Any Driver accumulating 8 or more Warning Points will automatically be assessed by the SRO Sporting Board and may be suspended for a period of time as defined by the Sporting Board.
c) Any driver who, after being suspended per 17.4b, accumulates additional Warning Points will be assessed by the SRO Sporting Board and may be suspended for a period of time as defined by the Sporting Board.
d) Warning Points remain with the Driver for 12 months.
e) Warning points are non-appealable

50.5 Drivers with Warning Points carried over from 2024 will have their Warning Points total reduced on a probationary basis at the start of the 2026 season. Drivers who have points deducted will then be observed for 2 (two) Events and be subject to the provisions of Article 17.6. Should any new points be assessed during the probationary period, the deducted points will be reinstated.

Points Total Prior to January 1, 2026	Points Total After January 1, 2026
8	4
7	3
6	3
5	2
4	2
3	1
2	1
1	0

DRAFT

50.6 Warning Points that are deducted will be done chronologically starting with the earliest date points were assessed. Any remaining points will remain for the entire 12 month duration from the date they were assessed.

50.7 An updated list of Drivers and their current Warning Points total will be published prior to the first Event of the 2026 season.

50.8 In addition to other penalties assigned for any breach of these sporting regulations and/or those of the International Sporting Code, or for unacceptable on track behavior, the Stewards may impose, based on an action brought before them or upon a recommendation by the Race Director, a period of probation, during which the party under probation must not be found responsible for any further breach of these sporting regulations, nor of any articles of the International Sporting Code, or commit unacceptable on or off track behavior. The Stewards may impose additional conditions on the competitor at any time during the probationary period.

50.9 Any further breach or unacceptable on track behavior during the period of probation may trigger an immediate suspension of competition privileges and/or access rights to Events and/or other penalties.

50.10 A period of probation shall not be shorter than two Event weekends, nor longer than one calendar year. A suspension triggered by a breach while on probation shall not be shorter than two Event weekends, nor longer than 1 (one) calendar year.

50.11 By decision of the Stewards, Warning Points are carried over between ALL classes in SRO America.

51. PROTESTS AND APPEALS

51.1 Protests shall be made in accordance with the FIA International Sporting Code. Appeals will be heard by USAC. The appeal fee (shown below) must be paid by bank transfer to USAC; the protest fee must be paid in cash, check, or bank transfer.

Protest Fee:	$ 1000.00 USD
Appeal Fee:	$ 3000.00 USD

51.2 Protests lodged after Race 1 of an Event may be heard after Race 2 of the same Event.

51.3 Protests will not be permitted for any scrutineering inspections for any reason.

DRAFT

51.4 Appeals may not be made against decisions (including the determination of the breach or the consequent penalty imposed) concerning the following penalties:

a) Drive through penalties, including those imposed during the last laps of a race, or after the race and converted to a time penalty.
b) Stop & Go penalties, including those imposed during the last laps of a race, or after the race and converted to a time penalty.
c) The invalidation of qualifying lap times.
d) Grid position penalties.
e) The deletion of race laps.
f) Post-race time penalties.
g) Any penalty that has been served.
h) Pit Lane Start.
i) Driver Warning Points.

51.5 Appeals shall be made in accordance with the FIA International Sporting Code Article 15. The Appeal process will not be handled at the circuit but through USAC and the delegated Court of Appeal.

51.6 A written Notice of Intention to Appeal against a decision of the Stewards must be lodged with the Chairman of the Stewards within 60 minutes of the publication of the decision. In circumstances where the Stewards consider that compliance with the 1 (one) hour deadline would be impossible, they may consider a different time limit for the notification of the intention to appeal. This time limit shall be provided in writing in their decision and shall not exceed 24 hours following the publication of the decision. The time limit for filing an appeal to USAC and the payment of the appeal fee shall be deferred accordingly.

51.7 An appeal fee becomes due within 96 hours from the moment the appellant notifies the Stewards of the intention to appeal and remains payable even if the appellant does not follow up the declared intention to appeal.

51.8 An appeal may be withdrawn without penalty only with the approval of the USAC representative.

51.10 The right to bring an appeal to USAC expires 96 hours from the moment the Stewards are notified of the intention to appeal on condition that the intention of appealing has been notified in writing to the Stewards within one hour of the publication of the decision (or any later time limit specified by the Stewards within the decision). This appeal may be brought by any electronic means of communication with confirmation of receipt. Confirmation by a letter of the same date is required.

51.11 USAC must render its decision within 30 days.

51.12 All parties concerned shall be given adequate notice of the hearing of any appeal. They shall be entitled to call witnesses, but their failure to attend the hearing shall not interrupt the course of the proceedings.

51.13 Any decisions by the Court of Appeal shall be final, binding and not subject to further appeal or legal process. The President of USAC may request a bond for costs involved with holding the hearing.

51.14 Following the lodging of an ~~a~~ppeal against a decision of the Stewards, or the giving of Notice of Intention to Appeal against a decision of the Stewards, any suspension of any penalty that may have been imposed will be in accordance with Article 12.2.3 of the International Sporting Code.

DRAFT

51.15 The Court of Appeal has the authority to extend the time limits for admission of appeals in such circumstances as are considered, at its sole discretion, to be appropriate in the interests of justice.

51.16 The USAC President, or his designee, shall appoint the Court of Appeal which shall consist of a chairman plus at least two additional members. No member of the appeal board shall have taken part as a Competitor, or official in the which the board will render a decision on, or shall have been directly interested, or involved, in the matters under consideration. The appointment of the board, and written notice to the appellant, or appellants, shall occur within 3 (three) days (or such other time as designated by the President of USAC) upon receipt of the appeal fee. USAC will notify all included parties of the time, place, and contact details/phone number for the appeal hearing.

51.17 The court shall hear the Appeal within 2 (two) weeks from the given notice. USAC may specify shorter timeframes where necessary for the prompt adjudication of the matter and a conclusion of controversies. The Court will determine what witnesses and evidence it will hear at its discretion. The parties may present their information to the Board directly, via their Team representative, or in written documents. The Court of Appeal may hear such evidence in such manner as it deems appropriate, relevant, and necessary under the circumstances.

51.18 After consideration of material deemed relevant, the Court of Appeal shall meet privately, reach its decision, and prepare a written opinion. It may decide that the penalty, or other decision appealed against should be nullified, mitigated, affirmed, increased, or that a different penalty should be imposed, but shall not order a race to be rerun. The Court shall order the return, or forfeiture, of appeal fees. The Court shall direct the disposition of protest fees and equipment examination bonds, if any, in those cases where the original Court's decision is nullified.

51.19 USAC and the SRO Motorsports Group reserve the right to publish any details including names from the Court of Appeal decisions. Persons, entrants, or organizations referred to in each said decision shall have no right, or action, against any person publishing such notice, and shall agree that said decision shall be final and binding. A copy of the final decision shall be sent to all parties to the appeal. Any penalties imposed by the Court of Appeal shall be effective immediately as stated in its decision. Penalties involving time, disqualification, suspension, or loss of points shall be made effective from the date of the conclusion of the race involved. Where the Court of Appeal upholds or amends (but does not nullify) any penalty imposed by the Stewards, then the penalty shall be effective from the date of its initial imposition and not the date of the decision of the Court of Appeal.

51.20 The Stewards may consider a Right of Review in accordance with the FIA International Sporting Code Article 14. The Right of Review fee (shown below) must be paid via Credit Card or bank transfer to USAC.

Right of Review Fee: $ 3000.00 USD (Three Thousand Dollars)

DRAFT

52. TESTING

52.1 A specific Balance of Performance test may be carried out for cars taking part in the Series.

52.2 Not applicable.

52.3 Not applicable.

52.4 Not applicable.

52.5 The SRO Technical Board is permitted to modify any parameter required to establish the SRO Balance of Performance.

52.6 The SRO Technical Board reserves the right to adjust the Balance of Performance up to 120 minutes prior to the start of Race 1. Teams will be notified of any such changes during the Event via a Stewards Bulletin.

52.7 If the Stewards are satisfied that any Competitor or Manufacturer has provided information which was misleading or has inappropriately influenced the BOP process before and/or during an event or where a Competitor's or Manufacturer's subsequent performance is higher than the expected result, they may impose sanctions or penalties before, during, or after an Event.

52.8 Cars must comply with the information and instructions given in the Balance of Performance document for the relevant Event, the current version of which will be validated by the Stewards via a Bulletin. Failure to comply will be considered a sporting infringement and penalties may be imposed by the Stewards.

52.9 One or more Official testing sessions and media days may be organized by the Organizer before the first event of the season. These will be open to all Teams but are not mandatory.

52.10 Official Paid Test Sessions will be held at the following events:

Sonoma (2 days)
COTA
Sebring
Road Atlanta
Road America
Barber
Indy

52.11 Not applicable

52.12 Teams may participate in a hardship lap to check a car after significant repairs or other issues. Any such laps will be scheduled and will consist of a single lap from pit out to pit in at a controlled speed behind the Safety Car without crossing the Control Line. Cars utilizing a hardship lap must change its four tires if participating in the subsequent session.

52.13 Private testing is defined as any testing carried out by any Team entered in the Series involving Driver(s) entered in any Event with Toyota GR Cup eligible cars. Private testing on any circuit which will host a Series Event is prohibited on any of the 7 days prior to the paddock load in date at the Event location

DRAFT

unless otherwise approved. USAC and/or SRO Motorsports Group are not responsible for any accident or injury occurring during unsanctioned testing.

52.14 Participation in Events, including Official test sessions, counting towards other Championships or Series is not considered private testing. However, participation in non-mandatory sessions included during these Events is not authorized from Monday of the week of the Event.

52.15 Tire development test sessions organized by Continental are not considered private testing. Permission will be granted for Teams and Drivers, nominated by the Car Manufacturer of reference, to participate in any such tests when requested by Continental to the Sporting Board.

53. PROMOTIONAL ACTIVITIES

53.1 The following restrictions apply during all Events:

a) Laps with the Race Cars and Drivers entered in the Event are only authorized as part of media activities to aid in the promotion of the Event, including on track activities for photo shoots (static and rolling), filmed laps for TV programs or other activities. These activities must be scheduled in advance of the Event with the Organizer.
b) Any other promotional activity must be approved by the Oraganizer a minimum of 14 days prior to the Event.
c) There are no restrictions on Drivers and Teams competing in other races taking place at the same Event provided this does not impact on their participation in the mandatory elements of the main Series Event, including briefings, podiums, press conferences etc.

53.2 Any breach of the Sporting or Technical regulations during promotional activities may be reported to the Stewards.

53.3 Cars are to remain at the track from the time they are scheduled to undergo scrutineering until the end of the Event. Exceptions, as specified in advance by the Organizer, may include parades, car exhibitions and demonstrations taking place outside the circuit or neighboring areas.

53.4 Autograph sessions may be scheduled during any Event at the time listed on the Event Schedule. Drivers are to attend any such sessions dressed in team kit, specifically a Team shirt, at the scheduled time, and to make themselves available for the full duration. Any Driver failing to attend may be reported to the Stewards.

53.5 Pit walks may be scheduled during any Event and will be listed on the Event Schedule. Cars must be on display in the pit lane for the duration of the pit walk. Cars must not be maneuvered during the pit walk. Fuel transfer is prohibited during a pit walk.

54. REPLACEMENT OF MECHANICAL PARTS

54.1 During the Event, it is forbidden to replace the following parts without authorization of the Stewards and the Technical Manager. Such replacements may be penalized up to and including exclusion:

a) The engine, the turbo(s), the cylinder head(s), cylinder head cover(s), oil pan and engine block, and/or parts that may be attached by means of seals.

DRAFT

b) The chassis or the monocoque structure.

54.2 Requests for changes which take place before Qualifying are subject to the Stewards decision.

55. FLAGS & FLAGGING – REFERENCE FROM FIA APPENDIX H

Flagging will be the official method to communicate with ALL Competitors during all on track sessions. Flags may be replaced or supplemented by lights and/or reflective panels; these shall have the same meaning as the flags.

FLAG	Note: *Any flag signal may be accompanied by additional messages from Race Control* Flag signals are based on the recommendations of FIA Appendix H Article 2.5.4 and 2.5.5
	GREEN When displayed by the starter, signals the beginning or resumption of a session. Also shown (waved) on track following a yellow caution area to indicate passing may resume when beyond the green flag. Also shown for the first lap of the first non-race session of the day for each series.
	BLACK/WHITE DIAGONAL (Shown with Number Board) Unsportsmanlike flag. Shown stationary to a Competitor once as a warning primarily for their driving conduct. Should further action be taken by the stewards, the Team will be informed immediately
	BLACK (Shown with Number Board) Once displayed, the Competitor must stop at his pit box on his next approach to pit entry. If a Driver fails to comply for any reason, this will be an additional breach and subject to further penalty by the stewards. This flag will not be shown for more than four consecutive laps.
	BLACK with ORANGE CIRCLE (Shown with Number Board) Mechanical problem that may endanger the Driver or other Competitors. Competitor must report to pit lane immediately –failure to follow this instruction will result in a Black Flag being shown to the Competitor.
	SINGLE YELLOW **Stationary:** Reduce speed, do not overtake, and be prepared to change direction. There is a hazard beside or partly on the track. Overtaking is prohibited until the Competitor has passed a green flag. It must be evident that a Driver has reduced speed; this means a Driver is expected to have braked earlier and/or noticeably reduced speed in that sector. **Waved:** Increased danger – be prepared to change directions or stop. There is a hazard wholly or partly blocking the track and/or Marshals working on or beside the track. Overtaking is prohibited until the Competitor has passed a green flag.
	DOUBLE YELLOW (Full Course Yellow – FCY) Danger: Reduce Speed, overtaking is prohibited throughout the circuit. Flags are displayed at all stations. **FCY** may be used with or without a Safety Car. All Drivers must gather in single file behind the leader or Safety Car. FCY shall remain until the race is resumed and a green flag is shown. May be used in conjunction with a board displaying the letters "SC", informing Competitors that a safety car is deployed on track. . A Full Course Yellow period will be deemed to be in operation simultaneously from the moment: a) A Full Course Yellow announcement is declared on the Race Control Radio Frequency b) Or is displayed on the timing monitor, c) Or is displayed on the DID d) Or double yellow flags are displayed around the racetrack e) Or yellow lights are displayed around the racetrack
	RED Session suspended. Use caution and proceed immediately to pit lane or a location as directed by Race Control. Overtaking is prohibited. During Races, Cars are considered under "Parc Fermé" conditions unless otherwise stated. Race Control will announce separately if the session will or will not resume.

DRAFT

	SOLID BLUE OR BLUE WITH YELLOW DIAGONAL Warning: faster/lapping cars are approaching. Use Caution. Exercise sportsmanship & allow racing room. If waved, this signals that another Driver is trying to overtake.
	YELLOW WITH RED STRIPES Caution, the racing surface may be affected by fluids or debris and may be slippery.
	WHITE **Start/Finish: WAVING**, Indicates last lap of a race. A LAST LAP board may be used. Both signals are advisory. **Corner Post: STATIONARY,** use caution as you are approaching a slow moving vehicle. **WAVING,** use caution as you are approaching a very slow-moving vehicle or a moving Safety Vehicle.
	BLACK & WHITE CHECKERED Indicates completion of a session or race. All cars must exit the course once they have passed start/finish and received the checkered flag.

DRAFT

APPENDIX 1 INFORMATION TO BE PUBLISHED UNDER ARTICLE 8.2 OF THE CODE

PART A

a) Name and address of the National Sporting Authority (ASN).
b) Name and address of the Organizer.
c) Date and place of the Event.
d) Postal and e-mail addresses and telephone and fax numbers to which enquiries can be addressed.
e) Details of the circuit, which must include:
    1. location and how to gain access
    2. length of one lap
    3. direction (clockwise or anti-clockwise)
    4. location of the pit exit in relation to the Control Line
    5. Grade of the FIA circuit homologation
    6. Date of the expiry of the FIA license
f) Precise location at the circuit of:
    1. Stewards' office
    2. Race Director's office
    3. Sporting checks
    4. Scrutineering, flat area and weighing
    5. Parc Fermé
    6. Drivers' and Competitors' briefing
    7. Official notice board, press conference
    8. Media center
    9. Media accreditation center
g) List of any supplementary trophies and special awards in addition to those specified in these Sporting Regulations.
h) The names of the following Officials of the Event, appointed by the ASN:
    1. Stewards of the Meeting
    2. Clerk of the Course
    3. Secretary of the meeting
    4. Chief National Scrutineer
    5. Chief National Medical Officer
i) Any other specific items.

DRAFT

PART B TO BE COMPLETED BY THE ORGANIZER

a) Timetable Information:
   1. Start of the sporting checks and Scrutineering on…… (date) at….. (time).
   2. Time and date of the Briefing
   3. Start time of the race(s).

b) Organization and Management of the Event

c) List of Officials nominated by the Organizer and the Parent ASN
   1. Permanent Chairman of the Stewards
   2. International Steward
   3. Race Director
   4. Deputy Race Director
   5. Technical Manager
   6. Chief Scrutineer for the Series
   7. Sporting Director
   8. Pit Lane Officials
   9. Sporting Secretary
   10. Chief Timekeeper
   11. Safety Car Driver
   12. Leading Car Driver
   13. Press Manager
   14. Driver Advisor

d) Any other Officials:
   1. Composition of the Sporting Board for the event
   2. Appeal, Protest and fines
   3. Other information including link to the Digital notice board

PART C – Detailed Timetable

PART D – Event Insurance

APPENDIX 2 NOT APPLICABLE

DRAFT

APPENDIX 5 SRO SPORTING BOARD – RULES AND REGULATIONS

INTERNAL REGULATIONS

Article 1 – Purpose

The SRO Sporting Board is a body set up by SRO Motorsports Group, the purpose of which is to manage certain aspects relating to the application of the sporting and technical regulations and the organization of the Series Events, other than those which fall within the exclusive remit of the Officials of the Event as defined by the provisions of the International Sporting Code.

Article 2 – Members

The SRO Sporting Board at each event will consist of the following people or their representatives whose roles may be combined:

a) The Permanent Chairman of the Stewards of the GT World Challenge
b) The Race Director
c) The SRO America Technical Director
d) The SRO America Sporting Director
e) The Series General Manager
f) A USAC Representative

Article 3 – Missions

The tasks of the SRO Sporting Board will include:

a) Issuing clarifications on the regulations and their interpretation
b) Making decisions on the application of the regulations at the Events, in order to respond to specific situations (e.g. shortening of grid procedures, timetable issues)
c) Responding to any situations involving the commercial management of the Series
d) Deciding on the acceptance of requests for private testing including coaching and participants of other series, and on any penalties or restrictions in the Series
e) Deciding on exemptions for Driver Categorizations
f) Deciding on requests for permission for Drivers to take part in the Bronze test
g) Deciding on any questions concerning points or the classification of the Series.
h) Deciding on any questions concerning issues that cannot be dealt with by the Stewards.

Article 4 – Meetings

Meetings of the SRO Sporting Board can be called at any point during an Event or can be convened by email between Events. Decisions will be taken by a majority agreement of the members. Two or more members may be authorized to take decisions on matters of derogations or permissions on behalf of the Board.

Article 5 – Right of Protest

Decisions taken by the SRO Sporting Board may not be protested or appealed.

DRAFT

APPENDIX 5A SRO TECHNICAL BOARD – RULES AND REGULATIONS

Article 1 – Purpose

The SRO Technical Board is a body set up by SRO Motorsports Group, the purpose of which is to manage certain aspects relating to the application of the technical regulations, other than those which fall within the exclusive remit of the Officials of the Event as defined by the provisions of the International Sporting Code.

Article 2 – Members

The SRO Technical Board will consist of the following people (or their representatives):

a) The Chairman of SRO
b) The SRO Technical Director
c) A Technical Representative

Article 3 – Missions

The tasks of the SRO Technical Board will include:

d) Adaptations and Changes to the Balance of Performance
e) Issues of eligibility of cars
f) Issuing Technical Notes to the Competitors

Article 4 – Meetings

Meetings can be held at any point during an Event or can be convened by email between Events. Decisions will be taken by a majority agreement of the members.

Article 5 – Right of Protest

Decisions taken by the SRO Technical Board may not be protested or appealed.

APPENDIX 5B SRO MOTORSPORTS FUND

INTERNAL REGULATIONS

Article 1 – Purpose

All money collected in the form of fines from Competitors entered in the Series will be placed in the SRO Motorsports Fund. This Fund will either be returned to the Competitors in the form of a Prize Fund or will be presented to a Charity/Not for Profit. The usage of the Fund in any given year will be announced to the Teams by means of a Bulletin from the Sporting Board.

Article 2 – Administration

The SRO Motorsports Fund will be managed by the Chief Finance Officer of SRO Motorsports Group. The balance of the account may be requested in writing.

DRAFT

APPENDIX 6 RESERVED FOR FUTURE USE

APPENDIX 7 MANDATORY TECHNICAL EQUIPMENT

GR CUP SUPPLIER DETAILS

TIRES
CONTINENTAL is the sole tire supplier for the Series

Tires for EVENTS must be ordered no later than 2 weeks before the Tuesday of the event week. Teams must abide by any prescriptions from the Continental Technical books

Continental Contact:

Adam Batton
Email: adam.batton@continental.com
Phone: +1 574 784 3207

RADIO EQUIPMENT
Racing Radios is the preferred radio communications partner.
Connor Harrington
+1 470 586 3265
Connor.harrington@racingradios.com

IN-CAR CAMERAS
During all Events, Teams must use the homologated video camera facing forward in the cockpit. The image must show the steering wheel, the view out the windscreen and the dash plaque bearing Driver last name and car number. All cameras must be able to utilize the MicroSD variety of data cards with or without an adapter. Teams must supply the data cards at each event; they will remain the property of the Team and will be returned at the end of each event. See Appendix 10 for set-up and use.

DRAFT

TRANSPONDER / LUMIRANK / TELEMETRY
All cars must be fitted with the homologated My Laps transponder. In addition, all cars must be fitted with the GPS Telemetry system in its entirety.

Transponder Contact:
MyLaps USA
2030 Powers Ferry Road (South East) – Suite 110
Atlanta, GA
30339 U.S.A.

Brad Hockaday
+1 263 412 4450
brad@professionalmotorsportssolutions.com

LUMIRANK Equipment
The Lumirank panels will be distributed by the Series at the start of the season. It is the responsibility of the Team to:

d) Install the equipment
e) Take care of the equipment
f) Contact the Series in case of any problems or in case of a change of category. In case of damage or loss, the Team will be invoiced for the value of the equipment.

Teams must purchase the necessary cables from the Series. Contact details and an order form will be provided.
The LED panel must be installed as seen below for all left-hand-drive cars, and on the opposite side for right-hand-drive cars. No segments may be blocked by any decal, tape, or object.

LUMIRANK
Mitchell Mefford
+1 270 779 0814
Mitchell.mefford@sro-motorsports.com

DRAFT

GPS TELEMETRY AND ANTENNA LOCATION

Details of the GPS Telemetry system can be found in the Handbook available on the Teams website.

1. Shark Fin Antenna (VBox, Bosch Telemetry)
2. Driver Radio Antenna
3. SRO Telemetry Antenna
4. SRO Marshalling GPS Antenna
5. Flat Patch Antenna (Optional)

Antenna must be mounted externally at the locations shown.
All antennas must be at least 20cm from each other and 15cm from the edge of the roof or windshield.
No other antennas are permitted within 20cm of these units.
Scrutineering may require antennas to be moved.

ADR Unit
Not Applicable for GR Cup.

DRAFT

FUEL

VP SRO 100

SRO 100
RACING FUEL

Description	Product No.
54 Gallon Drum	8464

SRO 100 is a clean-burning 100 octane, unleaded racing fuel that's formulated with 10% renewable components. VP designed this professional-grade blend for sports car racing and all other forms of motorsports that require unleaded fuel. This formula is used as a spec fuel for numerous racing series in North America.

PRODUCT BENEFITS:

- **Formulated with 10% renewable components**
- **High octane race fuel**
- **Clean burning**
- **Designed for sports car racing and all other forms of motorsports that require unleaded fuel**

SPECIFICATION SHEET: SRO 100
(Typical Values)

Color = Orange	Destillation:
Specific Gravity = 0.7650	IMP = 101.4 °F
MON = 94.5	10% = 141.7 °F
RON = 106	50% = 211.4 °F
(R+M)/2 = 100.3	90% = 217.7 °F
Oxygen Content = 3.61%	FBP = 234.4 °F
Oxidation Stability (min.) = 1440+	H:C ratio = 1.82
Leaded: No	O:C ratio = 0.03
	Stoichiometric A/F Ratio = 13.82
	Rev = 10/02/19

The VP Fuel Order form can be found at:

https://teams.sro-america.com/teams-login-documents?documenttype_id=8

APPENDIX 8 RACE CONTROL FREQUENCIES

The following provisional frequencies will be used as Race Control frequencies during the 2022 season.

CH	RX Frequency	Channel Type	TX Mode	QT/DQT Dec	QT/DQT Enc	Ran Dec	Ran Enc	Channel Name
1	462.2250	Analog	DPL 723					Race Control Frequency
2	461.2000	Analog	DPL 432					Race Control Backup Frequency

Any changes to the above list will be communicated in a bulletin

APPENDIX 9 OBLIGATIONS FOR TELEVISION

All cars should be ready to be fitted with a television onboard camera when so requested.

Teams must provide a fused minimum 12 gauge 12 Volt 5 Amp connection located in the passenger footwell with one of the following connectors:

1. TE Connectivity Superseal PN 282080-1
2. Deutsch DT-2S, DT-4S
3. Deutsch DTM-2S, DTM-4S

The pin out for all of the connectors is to be:
Pin 1 +12V
Pin 2 Gnd

The connection must be approved by the TV staff. If the car is not properly equipped, it may not be featured on TV.

Teams must provide a panel for the dashboard to show the car details when they have a camera installed. Teams should choose the best format for their dashboard. The Continental sticker will be provided by TV and should not be reproduced by Teams.

AVAILABILITY OF TEAM PERSONNEL DURING SESSIONS

For purposes of television coverage, it is requested that Team personnel and co-Drivers should, whenever possible, watch the race on the pit wall or in the front sections of the garages, within reach and sight of the pit lane TV cameras. This is to enhance the viewing experience by allowing the reactions to be seen.

DRAFT

APPENDIX 10 MANDATORY CAMERAS

The homologated V-Box camera system must be utilized. The Competitor is responsible for the installation of the system and that it complies with the requirements listed in the Technical and these Regulations.

PIT GANTRY - CAMERA SET-UP
Not Applicable .

APPENDIX 11 NOT APPLICABLE

APPENDIX 12 RESERVED FOR FUTURE USE

APPENDIX 13 NOT APPLICABLE

APPENDIX 14 NOT APPLICABLE

DRAFT

APPENDIX 15 SOCIAL MEDIA POLICY

Social media includes all means of electronic communication or posting of information and/or content of any sort on the Internet. This includes to one's own or someone else's web blog, journal or diary, personal website, social networking / affinity website, web bulletin board or a chat room, whether associated or affiliated with USAC and/or WC Vision, LLC/SRO Motorsports America or not.

Individuals are solely responsible for what is posted online whether by themselves and/or allowing others the ability to post online content for them. Individuals should consider the risks involved. Any social media interaction or contribution that adversely affects USAC and/or WC Vision, LLC/SRO Motorsports America, Members, or others may result in disciplinary action against individuals, up to and including exclusion from the series. This responsibility applies to all Drivers, Entrants, Family Members, Crew, Associates, Manufacturers or any other individual or entity who is a USAC and/or WC Vision d/b/a SRO Motorsports America Member and participates competitively in an event. The responsibility applies to all affiliated WC Vision d/b/a SRO Motorsports America or USAC officers, employees, agents, representatives, and subcontractors.

Inappropriate postings, including (but not limited to) statements, photographs, video, or audio recordings which may include discriminatory remarks, harassment, and threats of violence or similar inappropriate or unlawful conduct are prohibited.

Content that reasonably could be viewed as malicious, obscene, threatening or intimidating, that disparages others or that might constitute harassment or bullying is prohibited. Incorrect postings or mistakes should be corrected immediately with the updated version sent to the Press Official. Posts are "on the record" and available to the media, public, sponsors, and other business partners and subject to discovery in litigation matters. The removal of posts does not remove them from the record or any liability associated with the posts or content.

Posting of online rumors, speculation, or information about USAC, WC Vision, SRO MOTORSPORTS AMERICA and/or others until an official announcement, release or other post by official social media accounts is prohibited and could be subject to disciplinary action.

It is prohibited to post as a 3rd party or represent oneself or one's views as a spokesperson for USAC and/or WC Vision, LLC/SRO Motorsports America, or a fellow Member. Be clear and open about the fact that you are a Member of the series and the views are your own. This applies particularly to any blogs, interviews, documents, or media releases.

Information shared to individuals may be confidential and the intellectual property (IP) of others. Always obtain consent of the owner of IP or copyrighted materials and consider whether the material is suitable for use online. This confidentially extends especially to any knowledge of incidents or injuries which could be sensitive or legally privileged. Individuals must not use social media to comment on the identities, condition or other medical information of any Drivers, crew members, other Members or others involved in an incident prior to an official update from USAC and/or WC Vision LLC/SRO Motorsports America.

Retaliation is prohibited. USAC and/or WC Vision, prohibits taking negative action against any Member for reporting or for cooperating in a policy investigation. Member(s) who retaliate against another Member(s) for reporting or for cooperating in an investigation will be subject to disciplinary action, up to and including exclusion from the series.

The updated social media policy is not meant to discourage Members from exercising their rights to use social media. Social media plays an integral role in reaching out to and growing fan bases, engagement, marketing, and promotion to all entities. It is a way to give fans direct interaction with USAC and/or WC Vision / SRO Motorsports America, Drivers, Teams, tracks, and sponsors. This policy, if used correctly, will only enhance this experience for all parties involved.

Appendix 16 Media / VIP Rides

The series may conduct on-track activities using vehicles for media and VIP with the following requirements:

DRAFT

a) The Emergency EV(s), ambulance and track safety staff shall be on duty.
b) Any other on-track activities are prohibited during Media rides.
c) An SRO Motorsports America Class Manager or official shall brief Drivers and crews on the process and programs being followed.
d) Each on track car requires a car chief, who has radio contact with their Driver. The SRO Motorsports America Class Manager shall maintain radio contact with all car chiefs and race control.
e) All passengers must complete and sign the "Release Waiver" prior to entering a vehicle. All participants must wear the approved safety clothing including helmet in any race vehicle.
f) Cars dispatched in groups will have the fastest cars first. OEM vehicle speeds must be within the car's capability. If any incident occurs, all remaining vehicles must reduce speed and proceed to the Pits or as instructed.
g) Any on-track incidents must be documented by the stewards per FIA Appendix O Article 11 guidelines.
h) The Organizer reserves the right to terminate or shorten Media / VIP activities.

APPENDIX 17 DEFINITIONS AND GLOSSARY

Acceleration Zone: Defined area defined by cones adjacent to course, prior to the Start Stand.
Accessible: Capable of easily being reached.
ACCUS-FIA (Automobile Competition Committee for the United States): The ASN of the United States of America.
Active Suspension: Electro-mechanical and/or feedback control to any suspension components.
Adhesive: A chemical liquid that fuses multiple components together without fusing into a single component.
Aerofoil: Any device or part of a car, whose principal effect is to create additional positive or negative force.
Alternate Transmission: A variant to the OEM transmission, casing, ratios, engagement, shift etc.
Aluminium: Original pronunciation/spelling of Al3+ Non-Ferrous lightweight metal.
Aluminum: US pronunciation/spelling of Al3+ Non-Ferrous lightweight metal.
***ASN* (National Sporting Authority)**: National Club, association or federation recognized by the *FIA* as sole holder of sporting power in a country in accordance with Article 3.3 of the *FIA* Statutes. An *ASN*, as referred to in the *Code*, can also be an ACN (National Automobile Club) as defined in Article 3.1 of
the *FIA* Statutes.
Associated Parts: The parts, hardware, etc. needed to make a component, or system, work.
Automobile: Vehicle running in constant contact with the ground (or ice) on at least four non-aligned wheels, of which at least two are used for steering and at least two for propulsion; the propulsion and steering of which are constantly and entirely controlled by a *Driver* on board the vehicle (other terms including but not limited to car, truck, and kart may be used interchangeably with *Automobile*, as appropriate within types of competition). Also see Car.
Blocking: A change of vehicle position "defending" Driver's current position.
Bodywork: All entirely sprung parts of the car in contact with the external air stream, except parts associated with the mechanical functioning of the engine, and tractive power.
BOP – Competitive Parity: Conformity between cars based on a variety of performance window criteria.
Car: See definition "Automobile"
***Championship*:** A *Championship* may be a series of *Competitions* or a single *Competition*.
Chassis: The structural part of the automobile that the body and mechanical systems are attached to.
Circuit: Closed *Course*, including the inherent installations, beginning and ending at the same point, built or adapted specifically for automobile racing. A *Circuit* may be temporary, semi-permanent or permanent, depending on the character of its installations and its availability for *Competitions*.
Circuit Race: *Competition* held on a closed *Circuit* between two or more *Automobiles*, running at the same time on the same course, in which speed or the distance covered in a given time is the determining factor.
***Classification*:** Grouping of *Automobiles* according to their engine cylinder capacity or by any other means of distinction
(See *Appendices* D and J).

Closed Competition: A *National Competition* may be called "closed" when it is confined solely to members of a Club who themselves hold *Licenses* (*Competitor* or *Driver*) issued by the *ASN* of the country concerned.
Cockpit: The Driver/passenger compartment. The Internal volume of the main cell of the car.
Code: The *FIA* International Sporting Code and its *Appendices*.
Cold Air Induction: Takes cold air into engine without pressurizing the air.
Competition: Single motor sport activity with its own results. It may comprise (a) heat(s) and a final, free practice, qualifying practice sessions and results of several categories or be divided in some similar manner, but must be completed by the end of the *Event*. The following are considered as a *Competition*: *Circuit Races*, *Rallies*, *Cross-Country Rallies*, *Drag Races*, *Hill Climbs*, *Record Attempts*, *Tests, Trials,* drifting, *Slalom* and other form of *Competitions* at the discretion of the *FIA*.
Competitor: Person or body accepted for any *Competition* whatsoever, and necessarily holding a *Competitor*'s *License* issued by their *Parent ASN*.
Control Line: Line at the crossing of which an *Automobile* is timed.
Course: Route to be followed by *Competitors*.
***Cylinder capacity*:** Volume generated in cylinder (or cylinders) by the upward or downward movement of the pistons. This volume is expressed in cubic centimeters, and for all calculations relating to *Cylinder Capacity,* the symbol Pi will be regarded as equivalent to 3.1416.
Demonstration: Display of the performance of one or more *Automobiles*.
Disqualification: *Disqualification* means that a person or persons may not continue to participate in a *Competition*. The *Disqualification* may be for part of a *Competition* (e.g. heat, final, free practice, qualifying practice sessions, race, etc.) the whole *Competition* or several *Competitions* within the same *Event*, at the discretion of the stewards, and may be pronounced during or after the *Competition*, or part of the *Competition*, as determined by the stewards. The disqualified person's relevant results or times are voided.
Door: Hinged floor to roof bodywork component that gives access to cockpit, excluding windows, or rear hatch.
Double-File Lines: Two adjacent, single-file lines.
Driver: Person driving an *Automobile* in any *Competition* whatsoever and necessarily holding a *Driver*'s License issued by their *Parent ASN*.
Duct: A pipe, tube, or channel used for transportation of a fluid including air.
Electronically Controlled: Any process, that utilizes semi-conductor or thermionic, technology.
Electronic Driver Aids: Any system that may or may not be initiated by the Driver that causes a parameter, component(s), to adjust independently, in order to increase efficiency, or help minimize Driver error. (Examples include paddle shifting, stability control, launch control and traction control.)
Enclosed: Surrounded by a material.
Entry: An *Entry* is a contract between a *Competitor* and the *Organizer* concerning the participation of the said *Competitor* in a given *Competition*. It can be signed by both parties or result from an exchange of correspondence.
EU Professional Competitor: professional *Competitor* holding a *License* issued by any European Union country, or by a comparable country designated as such by the *FIA*. Within that context, a professional *Competitor* is one who declares to the relevant authorities the money he receives by way of salary or sponsorship for competing in motor sport and provides proof of such declaration in a form acceptable to the *ASN* which issued his *License*, or who otherwise satisfies the *FIA* of his professional status, including by reference to benefits enjoyed but not required to be declared to the relevant authorities.
EU Professional Driver: professional *Driver* holding a *License* issued by any European Union country, or by a comparable country designated as such by the *FIA*. Within that context, a professional *Driver* is one who declares to the relevant authorities the money he receives by way of salary or sponsorship for competing in motor sport and provides proof of such declaration in a form acceptable to the *ASN* which issued his *License*, or who otherwise satisfies the *FIA* of his professional status, including by reference to benefits enjoyed but not required to be declared to the relevant authorities.
Event: Single motor sport activity with its own results. It may comprise (a) heat(s) and a final, free practice, qualifying practice sessions and results of several categories or be divided in some similar manner, but must be completed by the end of the *Event*. The following are considered as a *Competition*: *Circuit Races*, *Rallies*, *Cross-Country Rallies*, *Drag*

DRAFT

Races, *Hill Climbs*, *Record Attempts*, *Tests, Trials,* drifting, *Slalom* and other form of *Competitions* at the discretion of the *FIA*.
Exclusion: A person or body shall be said to be excluded when they have been definitively forbidden to take part in any *Competition* whatsoever. It shall render null and void any previous *Entry* made by the person excluded and shall entail the forfeiture of *Entry* fees.
Fairing: Any item whose primary function is to produce a smooth outline to reduce drag and air resistance.
Fastener: Mechanism to maintain component in a fixed position serving no other purpose (Bolt, nut, screw).
FIA: The Fédération Internationale de l'Automobile.
Final Classification: results signed by the stewards and published upon completion of the scrutineering and/or all stewards' decisions (in the event of an appeal or of subsequent technical checks, a caveat can be added).
Finish Line: Final *Control Line*, with or without timing.
Finisher: See Sporting Regulations Article 48.3.
Firewall: Sealed bulkhead providing separation of the cockpit area from the engine compartment,
Floorpan*:* Material that makes up the bottom of the cockpit, from the firewall rearward.
Footwell: Areas of the floor pan occupants place their feet while seated. Excludes areas under OEM front seats.
Force Majeure: Unpredictable, unpreventable and external event.
Free Practice: Also called Official practice. Timed Sessions which may or may not be used to form a grid
Handicap: Method laid down in the *Supplementary Regulations* of a *Competition* with the object of equalizing as far as possible the chances of the *Competitors*.
Induction System: Any attached part(s) from the outer face of the throttle body to the inlet port.
Intake: An opening through which fluid/air enters an enclosure.
International Championship: *Championship* formed solely of *International Competitions* and which is organized by the *FIA*, or by another body with written consent of the *FIA*.
International Competition: *Competition* which procures a standard level of international safety according to the prescriptions decreed by the *FIA* in the *Code* and its *Appendices*.
International License: *License* issued by an *ASN* on behalf of the *FIA* and which is valid for *International Competitions* appropriate to the level of such *License*, provided that they are entered on the International Sporting Calendar.
International Sporting Code: Texts of the various regulations as published by the FIA.
Joker Tires: Substitute tire(s) that maybe used in a marked qualifying set without penalty.
Lap Record: The fastest time achieved over a single lap during a race.
License: Certificate of registration issued to any person or body (*Drivers*, *Competitors*, manufacturers, Teams, officials, *Organizers*, *Circuits*, etc.) wishing to participate or taking part, in any capacity whatsoever, in *Competitions* governed by the *Code*.
License-Holders' Register: List held by an *ASN* of those persons to whom this *ASN* has issued either a *Competitor*'s or a *Driver*'s *License*.
License Number: Numbers allotted annually by an *ASN* to the *Competitors* or to *Drivers* entered on its register.
Lubricant: Friction reducing liquid used on any moving parts to prevent "sticking" between multiple surfaces.
Marked Tire Set: Tires uniquely marked by the series for use in qualifying or race.
Mechanical Components: All those necessary for the propulsion, suspension, steering and braking, as well as all accessories, whether moving or not, which are necessary for their normal working.
Metallic: Typically opaque or shiny material with good electrical and thermal conductivity.
Mile and Kilometer: For all conversions of imperial to metric measurements, and vice versa, the *Mile* shall be taken as 1.609344 *Kilometers*.
National Championship: *Championship* organized by an *ASN*, or by another body with written consent of the *ASN*.
National Competition: Any *Competition* not satisfying any of the conditions of an *International Competition*.
National Record: *Record* established or broken in conformity with the rules established by an *ASN* on its territory or on the territory of another *ASN* with the prior authorization of the latter. A *National Record* is said to be a class *Record* if it is the best result obtained in one of the classes into which the types of *Automobiles* eligible for the attempt are subdivided, or an absolute *Record* if it is the best result, not taking the classes
into account.

DRAFT

Official Program: Compulsory official document prepared by the *Organizing Committee* of a *Competition* giving all information in order to acquaint the public with the details of the *Competition*.
Official Session Clock: The timekeeping system operated by the Official Timekeepers under the authority of the Race Director, used as the sole and final reference for the start and end of each Session, the application of time limits, and the timing of any penalties, suspensions, or interruptions.
Organizer: *ASN*, automobile club or another qualified sporting group.
Organizing Committee: Body approved by the *ASN* invested by the *Organizers* of a *Competition* with all necessary powers for the organization of a *Competition* and the enforcement of *Supplementary Regulations*.
Organizing Permit: Document issued by the *ASN* authorizing the organization of a *Competition*.
Original*:* Also referred to as OE, OEM or STOCK, as fitted to a new car approved by the DOT, or equivalent, for sale and road use. By default, U.S. spec parts shall be used if car is sold in U.S.
Original Profile of Bodywork*:* Unmodified OE profile of PRODUCTION bodywork. Shall include all lines, creases, openings for ducts/vents, etc.
Outline: A line marking the outer-limits of an object or figure.
Parade: Display of a group of *Automobiles* at a moderate speed.
Parameter: a numerical or other measurable factor forming one of a set that defines a system or sets the conditions of its operation.
Parc Fermé: Location where the *Competitor* is obliged to bring his *Automobile(s)* as foreseen by the applicable regulations.
***Parent ASN* (in relation to license-holders)**: *ASN* of the country of which the license-holder is a national (the country of his/her passport). In the case of an *EU Professional Competitor* or *Driver*, a *Parent ASN* may also be the *ASN* of the European Union country of which the license-holder is a bona-fide permanent resident.
***Parent ASN* (in relation to international series)**: *ASN* that requested approval of the series and, if its national regulations are referred to in the series regulations, shall be responsible for the application of those national regulations.
Participant: Any person having access to the *Reserved Areas*.
Pass: The overtaking car being clear ahead of the overtaken car.
Passenger: Person, other than the *Driver*, conveyed on an *Automobile* and weighs with not less than 60 kg.
Provisional Classification: results published after the end of the session or *Competition* concerned. This classification may be revised following a decision of the stewards.
RACB: Royal Automobile Club Belgium
Racing Room: Generally defined as sufficient space on the marked racing surface that under racing conditions, a driver can maintain control of his car in close quarters
Ram Air: Intake design which by vehicle motion increases static air pressure inside of the induction system above ambient pressure. Air tight systems using piping/hose from a duct or other sealed inlet source located in a high-pressure area of the vehicle are also considered ram air systems.
Rear Seat Platform: The raised area of the floor pan where the bottom cushion of rear seat is mounted.
Reckless: Having or showing no regard for danger or consequences; heedless; rash
Replica: Reproduction parts (excludes decals of parts) made to resemble the OE part or assembly.
Reserved Areas: Areas where a *Competition* is taking place.
They include, but are not limited to:

a) the track (*Course*),
b) the *Circuit*,
c) the paddock,
d) the *Parc Fermé*,
e) the service parks or zones,
f) the holding parks,
g) the pits,
h) the zones that are barred to the public,
i) the control zones,
j) the zones that are reserved for the media,

DRAFT

k) the refueling zones.

Restrictive: Serving to restrict and regulate.

Sanction: The documentary authority, granted by the official sanctioning body, to organize and hold a competition.

Semi-Automatic Gearbox: Transmissions where a gear change is aided by electro-mechanical components.

Severe Body Damage: Bodywork damage of multiple panels that require replacement, or significant repair.

Single-File Line: A line of cars arranged one vehicle **behind** another with no visible overlap as view from the front (not straddled behind).

Specification: Detailed documentation of dimension, measurement, etc.

Speedway: Permanent *Circuit*, with not more than 4 corners, all of which turn in the same direction.

Sprung Suspension: Whereby, all wheels are suspended from the body/chassis unit by a spring medium.

SR: Sporting Regulations

SRO: Stephane Ratel Organization

Start: Moment when the order to start is given to a *Competitor* or to several *Competitors* starting together.

Start Line: First *Control Line*, with or without timing.

Supercharging: Increasing mass flow of the fuel/air mixture in the combustion chamber (over the mass flow possible by normal atmospheric pressure, ram effect and/or dynamic effects in the intake and/or exhaust system) by any means whatsoever. The injection of fuel under pressure is not considered to be supercharging.

Supplementary Regulations: Official document issued by the *Organizing Committee* of a *Competition* with the object of laying down the details of a *Competition*.

Superficial Accident Damage: Minor damage on the chassis, drivetrain, or suspension not requiring component replacement.

Surround: To enclose on all sides.

Survival Cell: The area located inside of the roll cage structure located within the cockpit of the car.

Suspension: the Suspension deprives, for a specified period of time, the person subject to it of the right to take part, directly or indirectly and in any capacity whatsoever, in (i) any *Competition* organized or regulated by the *FIA* or the *ASNs* (or placed under their authority), and (ii) any preparatory testing and training organized or regulated by the *FIA* or the *ASNs* (or placed under their authority) or organized by their members or license-holders.

Suspension Stabilizer: A removable device that when added controls or limits suspension movement. (Watt's linkage, trailing arm, panhard rod, radius arm, traction rod, torque arm, lateral link, etc.)

Telemetry: The wireless transmission of data between a moving car and a third-party device.

Test: Authorized *Competition* in which each *Competitor* may select his own time for carrying it out within a period determined by the regulations.

Tool: An implement for performing or facilitating mechanical operations. Cannot be a person.

Track: Distance from outermost point on the passenger side wheel to equivalent point on the Driver's side

Turbocharging: See "Supercharging".

USAC: United States Auto Club – Official FIA sanctioning body of the Toyota GR Cup.

Vehicle: See "Automobile". Used in rules in reference to the automobiles approved for competition.

Visibility: Capability of being seen, perceptible to the eye, apparent, evident.

WCV: WC Vision, LLC

Welding: The process of fusing one or more components into a single unit (e.g. TIG, MIG,)

Wheel: Center and rim. The addition of a tire constitutes a "Complete Wheel".

Wheel Rim Width: Measurement from bead seat to bead seat.

Wheel Wickers or Peels: Any aero device that attaches to the body and stick s out in front of the tire.
